

Tutorials for Electronics

Learning can be fun if you have the right resources for it. This month we have for you some websites that could get you interested in electronics

NIRAJ SAHAY

electronics-tutorials.ws

This all-new website on basic electronics tutorials is one place to begin learning about electronics. The purpose of this site is to give students and beginners good basic electronics tutorials and information to help develop their knowledge and understanding of the subject. It has tutorials varying from learning colour coding for resistors to understanding digital electronics. Each tutorial has an option to post replies and comments to discuss; however, a forum is missing.

www.electronics-tutorials.ws

www.williamson-labs.com

williamson-labs.com

This website features a vast collection of tutorials on electronics, from basic to university level; more than 400 URLs, in over 90 related subject areas. It presents all the theory in the form of animations and 3D pictures, helping you to understand and imagine electronics better. For details, contact webmaster@williamson-labs.com

learn.sparkfun.com

SparkFun is an online retail store that sells bits and pieces to make your electronics projects possible. In addition to products, it also offers classes and online tutorials to help educate individuals on the wonderful world of embedded electronics. The tutorial section has more than 330 tutorials on different topics.

www.learn.adafruit.com

learn.adafruit.com

Learn how to use Arduino to blink an LED, control a motor, play sounds, hook up an LCD display and much more at Adafruit. Adafruit was founded in 2005 by MIT engineer, Limor "Ladyada" Fried. Her goal was to create the best online space for learning electronics and making the best designed products for makers of all ages and skill levels. The company has grown to over 50 employees in the heart of New York City, New York, USA, with a 1400+ sqm (15,000+ square feet) factory. The website gets updated daily and is capable of giving a complete learning experience to all.

hobbyprojects.com

Hobby Projects is a collection of links to thousands of electronic circuits, schematics, online tutorials and much more, where you can find quick solutions for solving your electronics design problems. New circuits, tutorials or links to useful circuits are added regularly as a resource for school and college students, beginners, hobbyists, engineers, inventors and consultants. The site has tutorials ranging from beginner to advance levels.
