

APLAB introduces Advanced Version of Ultra-compact Digitally

Programmable High Power DC Power Sources

APLAB offers Ultra Compact, High Efficiency Programmable DC Sources with an advanced version that gives higher power, regulation as well as efficiency and more programming options. The new series is designed aiming for increasing market share in Europe and USA besides Far East and India.

HI-POWER PROGRAMMABLE DC POWER SUPPLIES - PHP Series 800W to 7500W DC Output

Seven Models with Programmable Voltage Range : 0 to 10V to 0 to 120V
Maximum Power per 1U high module : 1400W
Master Slave

Features

- High Power Density: 1400W in a 1U High Euro Rack unit.
- Soft Switching for low losses and low Ripple and Noise
- Industrial Digital Encoder for Voltage and Current Setting
- μ P based system for data Logging and ultra-stable voltage reference
- Active Input PFC with universal Line Input: 95V to 270V AC/ 50-60Hz
- Parallel Operation up to 9 units with Active Current Sharing
- Isolated Analogue Programming and Monitoring Surface
- Wide Choice of Interface RS232, RS485, GPIB for External Programming
- Lab-View and Lab-Window Drivers
- Standard 19" Rack Mount Suitable for ATE and OEM Applications
