

TELEDYNE LECROY
Everywhere you look™

World's first and the only

100 GHz Real-Time Oscilloscopes

KEY FEATURES

- 10 GHz to 100 GHz Industry leading Analog Bandwidth
- Up to 240 GS/s sample rate
- Long Memory - Up to 1.5Gpt/ch
- Modular Design - build system with 80 channels of 36 GHz each
- ChannelSync™ Architecture for 130 fs matching between channels
- Multi-Lane eye, Jitter and Noise Analysis with SDAIII-CompleteLinQ
- Optical Modulation Analysis with Optical-LinQ
- PAM4 Eye, Jitter and Noise Measurements with PAM4 Signal Analysis
- Industries only true hardware 14.1 GB/s serial trigger

With 100 GHz bandwidth and 240 GS/s sample rate, the LabMaster 10-100Zi real-time oscilloscope boasts the world's highest bandwidth and fastest sampling rate. This world-leading performance is key to analyzing and understanding the fastest phenomena found in R&D labs where engineers and scientists are working on next-generation communication systems, highbandwidth electrical components, and fundamental scientific research.
