

fibre links between the baseband station and remote radio units.

By adding RF over OBSAI (RfOBSAI) analysis components to its CellAdvisor products, JDSU allows technicians to point out and rectify interference. Two core technologies, RfOBSAI and RfCPRI, record and analyse RF metrics. To ensure end users experience top-notch mobile service, engineers locate interference by capturing and analysing RF elements from mobiles (uplink) as well as radios (downlink). CellAdvisor base station analysers perform fibre, mobile phone signal analysis, CPRI, cable, interference and OBSAI tests on a single instrument.

Vendors creating engineer-friendly tools

We have been seeing greater use of smartphones in testing for some time, but the roles these play have been increasing steadily. Once this blends in with cloud services and

Incoming: T&M solutions for 5G wireless communication systems

With an aim to launch 5G commercial services in 2020, NTT DOCOMO recently joined hands with Keysight Technologies for development of next-generation 5G wireless communication systems. 5G's performance will be addressed with enabling multiple technologies including new air-interfaces, massive multiple-input multiple-output (MIMO), ultra-broad bandwidths and mmWave frequencies. Keysight also recently introduced the 5G channel sounding reference solution designed for promoting advanced research of mmWave 5G channel models.

Among the mobile broadband requirements of 5G are new technologies generating over-the-air data rates as high as 10Gbps, as cited in a press release from Keysight. To meet these requirements, new air-interfaces are being developed to function in frequency bands from 10GHz to 100GHz. The 5G channel sounding reference solution allows researchers to distinguish the channel behaviour in these frequency bands and empower them to develop necessary channel models for designing and validating air-interface alternatives.

analytics, we might see the sort of disruption here that we saw the Internet of Things (IoT) do to the consumer world.

While some consider the IoT to be like a tech revolution, others like to think of it as old wine in a new bottle; some even say the wine blend has gotten better and cost-effective over the years.

Whatever floats your boat, the IoT sure seems to be catching up in almost every segment including test and measurement (T&M). Many T&M vendors are making the current generation of tools for testing engineer-friendly RF designs by integrating mobility, connectivity and features depending on the current set of market requirements. ●

THE BEST CONNECTOR SYSTEMS FOR HOME APPLIANCES AND AUTOMOTIVES

- IDC Tools and Machines
- Insulation Displacement connectors
- Multiple connector systems in various pitches
- Crimp contacts in several material with different plating

About Stocko Contact: Stocko connectors are widely used in all types of harnesses used in Home Appliance, Automotive & HVAC industries. Stocko Contact is known for high quality connectors like IDC articles, crimp contacts, tabs, bulb holder etc.

Visit Us @ **electronica india 2015**
Booth No. 1035, Hall No. 10
September 09-11, 2015,
Pondicherry, New Delhi

Applications:	Advantages:
• Stoves	• Saves Time
• Lighting system	• Saves System cost
• Air Conditioners	• Saves Labor
• Refrigerators	• Secure & Long lasting connections
• Washing Machines	
• HVAC Industry	

AUTHORIZED DISTRIBUTORS IN INDIA, SRI LANKA AND UAE

AURO CONTROLS PRIVATE LIMITED
ISO 9001:2008 COMPANY

Florina Apts., 6th Floor, S. No. 2/1/7, Erandwane, Off. Karve Road, Pune - 411 004. INDIA
