## Firefox 3.6 (utilities, 794 MB)

Mozilla Firefox is a free and open source Web browser that is managed by Mozilla Corporation. The latest stable version is Firefox 3.6, which was released on Jan. 21, 2010. There are quite a number of features that Firefox has brought with its new release. Persona is one cool feature that can be used to decorate your browser. There are a lot of Persona options. The good thing about installing Persona is that the user does not need to restart the browser after installing. Another attractive feature is the Awesome bar, which gives the user a better way to remember URLs. Apart from that, Firefox offers one-click bookmarking, easy customisation, session restore, password manager, private browsing and parental controls. For more information, visit <http://www.mozilla.com/en-US/firefox/personal.html>

## Air Hawk 3 (fun, 19.3MB)

Air Hawk is basically a helicopter game where the gamer needs to destroy the terrorist base and conquer that region. Air Hawk 3 is a sequel to Air Hawk 2. This new version comes with beautiful 3D effects and appropriate sound effects. The game features 24 large levels over a hundred different units. As the gamer progresses through the game, new weapons and power to helicopter come handy. The minimum system requirements are Windows 98 through Vista, Pentium II 400 MHz or equivalent, 128MB RAM and DirectX 8 compatible sound card.
