LIGHTING

PowerLED replacement fittings

Binay has introduced a PowerLED replacement for a 36W fluorescent tubelight, in surface-mounting fitting, model 501/136. It has illuminance level of 85 lux measured from a distance of 1.8 metres (compared to 56

lux of an equivalent 36W fluorescent tube) and power consumption of 25 watts (compared to an equivalent 36W fluorescent tube's 60W with ferromagnetic ballast and 40W with electronic ballast).

POWER SUPPLY

SMPS for industrial automation systems

Shavison has introduced 35mm DIN-rail-mountable SMPS for PLCs, SCADA systems, AC and DC drives, and PC-

or microcontroller-based industrial automation systems. The SMPS have built-in transient protector and EMI

filter, and protection against short-cir-

cuit, overload, over-voltage and over-temperature.

COMPUTING

Six-core CPU-ready motherboard

Gigabyte Technology has launched an AMD AM3 socket motherboard for

high-end gaming and high-speed data transfer on systems featuring AMD's six-core CPUs.

Featuring the AMD 890GX chipset paired with the SB850 South Bridge, the GA-890GPA-UD3H motherboard is claimed to offer the industry's first native support for Serial ATA 6Gbps for up to six devices.

Not only does it deliver flawless HD video playback, but enabling SATA 6 Gbps with RAID functionality, USB 3.0 support and GIGABYTE 3x Power Boost means that users are able to spend less time waiting for their content to transfer, and more time to actually enjoy it.

Intel G41-based motherboard

Simtronics Semiconductors has rolled out an Intel G41 chipset based motherboard. The SIMM INT G-41 E(J), when combined with Intel Core2 family processor, offers major advancements in video, graphics, responsiveness and scalability. In addition to the video, the Intel G41 Express chipset delivers optimised 3D graphics performance and support for Microsoft DirectX 10, Shader Model 4.0 and OpenGL 2.0.

Powered by next-generation

Intel graphics media accelerator X4500, the motherboard includes built-in support for smooth high-definition video playback without

the need for add-in video cards or decoders and enhances the customer experience.

SIMM INT G-41E(J) is priced at Rs 3400.

Wireless laser mouse

Targus has launched a wireless laser mouse that reduces wrist strain with its ergonomic design while the soft and flexible side grips provide comfort during use.

The AMW51AP mouse features a 1200dpi laser sensor for smooth movements. Wireless capability eliminates

cables and clutter from the workspace, while 2.4GHz RF technology significantly reduces cordless interference, delays and signal drops.

The mouse comes equipped with high-quality energiser batteries and provides 15 months of battery life depending on usage. The battery life indicators let you know how much power is left, giving advanced notice when an extra set of batteries is needed.
