Miniature limit switches

ESSEN DEINKI has introduced a miniature snap-action limit switch (type LSMS11) having 1NO + 1NC contact arrangement for space-constrained applications. It is rated for operational current of 6A at 24V-400V, 50Hz for AC15 duty and 0.6A at 230V DC for DC13 duty.

The switch is operated by a long overtravel plunger and comes in a plastic enclosure having IP40 degree of protection. It is suitable for door interlocking and automatic control functions and finds wide use in vacuum circuit breakers.

Versatile chipset for HD entertainment

AMD and its motherboard partners have unleashed ATI Radeon HD 4290 Graphics with the AMD 890GX chipset—a versatile, affordable and energy-efficient solution for high-definition visual computing.

The 890GX chipset redefines the way you play with versatile graphics configurations, including DirectX 10.1 graphics on the motherboard and support for up to two high-performance ATI Radeon premium graphics cards with ATI CrossFireX technology. With integrated ATI Radeon HD 4290 Graphics, family and friends can enjoy accelerated and enhanced high definition and 1080p Blu-ray playback including dual-stream picture-in-picture on Blu-ray 1.1. Standard DVD movies can be viewed in near high-definition quality with DVD upscaling with post-processing to enhance standard- and low-resolution videos and movies on

HD displays.

DC-DC controller for battery-powered devices

Linear Technology has unveiled a synchronous, step-down DC-DC controller with low quiescent current and two-phase dual output. This DC-DC controller is good for portable instruments and battery-powered applications. It draws only 170 μ A with one output active and only 300 μ A when both outputs are active.

Video SoC

Texas Instruments has introduced the TMS320DM8168 DaVinci video system-on-chip (SoC) that consolidates all of the capture, compression, display and control functionalities of an HD multi-channel system onto a single chip. Designed specifically for video security and video communications applications, this SoC offers extreme integration including a 1GHz ARM Cortex-A8 and a 1GHz TI C674x digital signal processor (DSP) core. This reduces system electronic bill-of-material costs by 50 per cent, as well as board area and power consumption by replacing the functionality of more than ten discrete components.

STORAGE

256GB USB flash drive

For those who want easy access to their full media library, Kingston Digital has released a 256GB USB Flash drive. The DataTraveler 310 can store up to 365 CDs, 54 DVDs or 51,000 images. It makes an entire collection of data easily portable. It features Password Traveler software,

which allows the user to create and access a password-protected privacy zone. The secure area of the drive can account for up to 90 per cent of the

drive's capacity and does not require administrator rights.

The DataTraveler 310 is priced at Rs 48,380.

MISCELLANEOUS

PCB holders

Guarang Electronics has introduced PCB holder profiles that allow quick and easy mounting of PCBs on all three rails (35, 15, G) and the wall/panel. The profiles can be used to mount standard 73mm and 108mm

wide PCBs.

These are available in standard one- or two-metre length or can be easily cut to the required lengths.

The typical applications of PCB holders include mounting of custom PCB and standard interface modules for DIN connectors, sub-miniature DIN connectors, flat cable connectors and also modules like relays, optocouplers, switches, fuses, diodes, veristors, power supply modules, over-voltage protectors, data transmitters and receivers, and analogue-to-digital converters.
