

## Notebooks and tablets top PC sales

Notebooks and tablets have captured 70 per cent of the total PC market in just two years. Their share was already more than 55 per cent of the market last year and would keep growing through 2012 based on the demand for ultraportables and tablets like the iPad,

India not-for-profit body to not only expand solar water heating usage but also promote applications beyond that. The association will be headquartered at Delhi.

Titan Energy System has designed and deployed a solar power system for Karnataka Power Corporation Ltd. The 3MW ground-mounted

a growth engine. Amongst the BRIC nations, India stands as the only exception where 3G rollout is yet to take place.

eMarketer estimates that mobile Internet users in India will grow from 5 million in 2009 to 162.1 million in 2014 with a CAGR of 100.5 per cent. In 2010, mobile Internet users in India will stand at 12.1 million, which will go up to 30 million in 2011, 65.1 million in 2012 and 114.2 million in 2013.

## India not ready for 3D yet!

Sony India, Samsung, LG Electronics and Panasonic will launch their first 3D TVs in India soon. However, the biggest challenge that these companies will face is lack of any 3D content for television viewers in India. The little content available in the international market would appeal to a negligible section in the country.

The players are aware that unless broadcasters and other content creators step in to work on the expensive 3D technology, it will be a tough task to make consumers pay more than 40 per cent over LCD TVs for a new product that offers nothing extra as of now.

"We are not expecting big business from the 3D TV foray; any sales of 3D TV will be considered a bonus," said Amitabh Tiwari, head of sales at LG Electronics India. "Content for 3D is costly to make, so viewers will have little choice."

## Electronics hardware waits for a special package

ELCINA Electronic Industries Association of India appreciates the reduction in excise duty to 4 per cent on LED lighting—an industry which needs urgent attention and encouragement. However, there is some ambiguity on whether this reduction is applicable to the LED components that India aspires to manufacture. In addition, some essential inputs for manufacturing electronic components have been included in the zero-duty import list for actual users. This was strongly recommended

Apple MacBook Pro notebook

according to Gartner.

Desktops will gradually become a minority and are likely to see any growth only in the developing world, Gartner said. Cost, not performance, is now increasingly the main driver for desktops.

## Global PV market clocks new high, India gets funding

Worldwide solar photovoltaic (PV) installations reached a record high of 6.43 gigawatts (GW) in 2009, reports Global Solar Technology.com. The PV industry also generated \$38 billion in global revenues in 2009, raising more than \$13.5 billion in equity and debt.

At the domestic front, the International Finance Corporation has agreed to invest \$10 million in India's first commercially viable solar power project.

In another development, India's installed solar thermal players have come together to float Solar Thermal Federation of India (STFI)—a pan-

system covers more than 48,562sq.m (12 acres) and is the largest grid-connected solar project in India. Titan plans to use Suniva's technology to develop a series of large-scale projects and installations in Andhra Pradesh over the next five years.

Birla Power has floated a special-purpose vehicle (SPV), called Birla Urja, for the solar and thermal power business. It will also invest close to Rs 50 billion to set up thermal and solar power projects in the next three years.

## Mobile ad spending to soar in India

Mobile advertisement spending will reach \$35.4 million this year, as compared to \$20.8 million in 2009. It will climb to \$56.4 million in 2011, and \$85.4 million in 2012, according to US-based digital research firm eMarketer.

With the increase in demand for smart phones and 3G network, mobile Internet data usage will become
