by ELCINA.

Full exemption from customs, CVD as well as SAD has been extended to parts for the mobile phone chargers and hands-free headphones. ELCINA believes it was done to encourage manufacture of these two accessories. However, this will discourage development of local value chain and the industry will remain dependent on imports due to total exemption from excise duty. Local parts for chargers and hands-free headphones would cost more as they are manufactured from inputs (plastic, copper, metals) that are subject to tax.

While the government has recognised electronics hardware as a key sector for the Indian economy, the budget has once again not given any clear direction to this sector, according to ELCINA.

Government invests in OFC network in villages

The Indian government will invest Rs 180 billion over three years to lay a 500,000km optic-fibre cable (OFC) network to reach every gram panchayat. For this initiative, it may invite the private sector to participate and come up with wireless measures.

An infrastructure company will be carved out of Bharat Sanchar Nigam Ltd to implement the project and work with other PSUs like Power Grid Corporation of India and RailTel.

PC giants target education sector

PC giants like Hewlett-Packard, Acer, Lenovo and HCL are eyeing e-governance projects and have increased their budgetary allocation for the education sector to step up their computer sales.

According to industry estimates, around 35 per cent of PC sales are triggered by the government, banking, financial services and insurance (BFSI) and education sectors, 35 per cent demand comes from small and medium businesses (SMBs), while the balance 30 per cent comes from consumers.
