

Reliable & Ingenious Solutions for the LED Industry.

Thermal Management

Thermally Conductive Adhesive Transfer Tapes

90° Peel Adhesion to Bare Untreated Aluminum

- High Mechanical Strength with Immediate Tack • Excellent Shock Performance & Thickness Control • Die - Cut Sizes Available in 5, 10, 15 & 20 mil Thicknesses • Avoid the mess, hassle and cost of greases, fasteners and clips • Enhance productivity

Thermal Interface Pads

Through innovative 3M technology, these soft and conformable pads provide high levels of conductivity for the more demanding applications in the electronics industry.

In addition, the pads provide excellent handling and can be die cut to fit most applications. Available in silicone and non-silicone elastomers.

- Thermal Conductivity: 1.0-4.1 W/m-k
- Available in silicone and acrylic elastomers

Thermally Conductive Adhesives

This range of liquid adhesives has minimal odor and superior structural strength adhesion. Dispensing is easy for high output in-line automated manufacturing and manual application. Adhesive flows and fills micro-spaces on surfaces. Ultra-thin bond line helps achieve low thermal impedance.

PCB Processing

High Temperature Tapes for PCB masking upto 260°C, low static, no adhesive residue

Novec™ Flux Remover & Cleaners
Zero Ozone depletion, non-flammable,
Leaves no residue, High performance

Electrical Insulation

Insulating tapes & thin wall heat shrink tubes

Performance Matters!
