

Online Storage Repository for your Digital Content and Libraries

Growth of digital content on the internet, and high adoption of online information dissemination methods is making every educational institution look at going online with their academic curricula, lessons, lectures, Podcasts, Audio-Visual and Animated lessons/content. With the options to digitize printed content & procuring online content for academic curriculum becoming easy and very prevalent in our country, Information technology is helping many Educational Institutions set up online portals and information networks within the campuses, and helping them setup:

- Round-the-clock online access to information portal & College Websites
- Online access for Students of Distance Education
- Continuous and fast access to Student academic curriculum for effective learning & online collaboration

HP StorageWorks X1000
Unified Storage for small and mid-sized environments

To help Consolidate all information, you need to have a Storage Solution which will address this File-data explosion, and help with data storage for a few application servers, have an easy backup facility, without needing a huge investment

HP Storage Works Solutions portfolio presents a simple Unified Storage solution which will store, protect, and archive the increasing file content, the HP Storage Works X1000 Network Storage System. This Microsoft® Windows®-based solution easily integrates with existing Windows environments and is easy to manage for a small staff already familiar with Windows.

The X1000 Network Storage System:

Handles any type of storage, from individual files to data from applications, such as Microsoft Exchange, SQL, SharePoint, VMware or Oracle databases.

Helps reduce storage volumes by using file-based de-duplication, so you aren't unnecessarily storing multiple copies of the same information.

Connects via Ethernet, so it doesn't require an expensive upgrade to your existing transfer protocol.

Comes with automation and remote management software, so you don't have to worry about common management tasks and you can help from afar when your system requires it.

Costs about the same as a file server yet offers shareable storage that isn't locked to a single server or application.

What's more?

Attach a Tape Drive directly to the X1000 Network Storage System, and backup your file-data and application Volumes, all integrated with your storage console at no extra cost.

Perfect for your campus networks, the HP StorageWorks X1000 Network Storage System easily integrates into:

- Digital Library & Content repository solutions
- DSpace Portals for Online content
- Thin-client and VDI Solutions within your libraries and networks
