## 3G-READY WATCH PHONE

LG'S WATCH PHONE LOOKS LIKE A HIGH-END TIMEPIECE

Price: Rs 49,990

If you long for a single device to wear and at the same time communicate, go for LG's Watch Phone. It looks like a wrist watch but allows you to make calls. Its Bluetooth headset makes the communication convenient. The phone is only 13.9mm thick and has a curved tempered glass face and high-quality metal casing. It is claimed to be the first touch watch phone in the world to feature 7.2Mbps 3G HSDPA compatibility, enabling high-speed data transmission and video phone calls using the built-in camera.

The phone has sharp looks and brings along with it the luxury of wearing a stunning piece of jewelry. It uses materials and stylistic elements found in watches from top manufacturers, so users will feel comfortable wearing it at any occasion.

## NEW BRAVIA LCD TVs

SOME OF SONY'S NEW BRAVIA LINEUP ARE INTERNET-ENABLED AND ALLOW YOU TO ACCESS WEBSITES LIKE YouTube, FACEBOOK AND YAHOO.COM

Sony India has launched 24 new models in the Bravia NX, EX and BX series with screen sizes varying from 55.9 cm (22 inches) to 152.4 cm (60 inches). These LCD TVs use state-of-the-art monolithic design, 200Hz Motionflow technology and image blur reduction for smoother pictures. Their 'live colour' feature produces incredibly vivid colours on the screen. Using MPEG noise reduction and Intelligent Picture Plus features, the TVs considerably reduce noise and produce pictures that are much sharper, clear and noise-free.

Combining the prowess of the Internet and TV broadcasts, some mod-

els bring on-demand Internet content to TV allowing you to access websites like YouTube, Facebook and Yahoo.com.

Price: Rs 16,900 to 349,900

## 216CM FULL HIGH-DEFINITION PLASMA DISPLAY

PANASONIC'S PLASMA DISPLAY PANEL WITH NEO PDP TECHNOLOGY TAKES YOU FROM THE REAL LIFE TO FULL-OF-ACTION REEL LIFE

Panasonic has launched a 216cm (85-inch) full-high-definition plasma display embedded with the Neo PDP technology that gives high electroluminescent efficiency. The 99mm thin plasma panel can be upgraded at any point of time and comes with triple function slots, which allow terminal boards to be swapped according to the video source. In addition, you can connect your laptop to it by inserting a wireless presentation board. It can further be used as a touch panel after an infrared panel attachment. The panel also features portrait zoom, external control inputs like RS-232 and LAN port.

The high visibility of this ultra-large screen—equivalent to four 107cm (42-inch) screens—makes it ideal for eye-catching large digital signages at public places.

Price: Rs 2 million
