MULTI-TOUCH NETBOOK TABLET

LENOVO'S IdeaPad S10-3T HAS A SCREEN THAT CAN SWIVEL 180 DEGREES AND FOLD OVER TO TRANSFORM INTO A TOUCH TABLET

Lenovo's IdeaPad S10-3t is the first mid-range tablet netbook in India. The netbook comes with fingertip touch-screen technology, rich multi-

media features and useful applications. With a sleek 25.7cm (10.1-inch) screen that can swivel 180 degrees and fold over to transform into a touch tablet, it is targeted at students, frequent travelers and those who prefer the extended touch experience.

The netbook is powered by Intel Atom N450 processor with 250GB HDD memory storage. It offers features like one-touch controls for logging on and logging off, a rich audio experience with stereo speakers and Dolby headphone audio, and DirectShare for quick and easy synchronisation of files with another notebook without having to connect to the Internet.

Price: Rs 30,740

3G-READY NOTEBOOKS

FUJITSU'S LIFEBOOK NOTEBOOKS RAISE THE BAR IN MEETING CUSTOMERS' MOBILITY NEEDS

Price:
LIFEBOOK T900: Rs 129,990
LIFEBOOK P3110: Rs 63,500
LIFEBOOK S710: 90,900
LIFEBOOK S760: Rs 102,500
LIFEBOOK 770: 124,500

Fujitsu India has rolled out 3G-ready notebooks under the Lifebook umbrella. The T900 is a 33.8cm (13.3-inch) ultra-versatile notebook for professional users. It comes with a bidirectional, rotatable, wide-view, high-bright LED display and is powered by Intel Core i5 processor. The P3110 is a 29.5cm (11.6-inch) notebook that comes with an ultra-low-voltage Intel Core2 Duo processor, high-resolution LED screen and EnergyStar 5.0 rating. It weighs just about 1.6 kg and has an extended battery life of six-and-a-half hours.

The S710 weighs just about 2.15 kg and this makes it one of the lightest modular 35.6cm (14-inch) notebooks

in the industry. It is powered by Intel Core i5 processor. The S760 has a 33.8cm (13.3-inch) display, weighs just 1.6 kg and is powered by Intel Core i5 processor. The P770, powered by Intel Core i7, has one of the smallest footprints in the 30.5cm (12-inch) market.

The T4410 is a 30.7cm (12.1-inch) notebook with multiple-touch capability. It is powered by Intel Core2 Duo processor.

Telenity introduces mobile marketing platform

Telenity has launched Canvas SmartAds—a mobile marketing platform that facilitates new business models for mobile marketing and advertisement. The platform integrates location aspect with mobile advertisement and allows contextual targeting of subscribers on the go.

Converse links mobile Internet solutions and BSS

Converse has coupled its business support system (BSS) and active customer management solution to help operators capitalise on the explosive growth in data traffic. This combination allows operators to better manage network capacity, offer segmented price plans, prevent bill shock for subscribers, deliver quality-of-service guarantees and impose fair usage limits on high users.

RockeTalk introduces mobile greeting cards

RockeTalk now allows users to select animated cards, add their own voice, image or video message and send to any mobile or email free of charge. Users can download the RockeTalk application from 'm.rocketalk.com' or 'wap.rocketalk.com'.

SafeNet launches data security solutions

SafeNet's new solutions enable organisations to ensure the security of sensitive data in cloud deployments. These include intelligent authentication tokens and secure cryptographic key storage.

FinePix technology in FUJIFILM cameras

FUJIFILM India has introduced the FinePix technology—a super-intelligent flash that helps photographers take better pictures irrespective of the light conditions. FUJIFILM FinePix range of digital cameras automatically adjust to the right amount of light for the scene.

Apalya gets exclusive rights for IPL

Apalya Technologies in partnership with Global Cricket Ventures has bagged the exclusive mobile and live video streaming rights for all IPL matches for the next three years. The partnership will enable sports fans to catch all the IPL action in real time on their mobiles and laptops through mobile data cards.
