

WEBSITES FOR EMBEDDED ENGINEERS

If you are looking for some crisp and quick information to help you in your embedded design, here are some websites that may help

Embedded Star

This website brings you a categorised collection of technical papers, articles, white papers, embedded blogs and download links. It also provides you with the names of the companies categorised by the services and products offered. The description of the website says "the way northern star guides the travelers home, Embedded Star is a guide for embedded universe." An online publishing company, Online Destiny, owns and maintains this website. Overall, it can be a quick reference guide that is presented in a structured manner. Embedded Developer

Embedded Developer website provides a very useful search option for processor and tool solutions from all major manufacturers. This simplifies the design process for engineers who have specific requirements and are looking for alternatives or similar products. You can compare the products, devices and tools, download datasheets, order samples, check inventory and order from Dig-Key. The website has partnered with all major manufacturers and tool providers, which serves as a catalyst. For more information, e-mail 'Mike.Stoumen@EmbeddedDeveloper.com'
