STORAGE

16GB keychain USB flash drive

Transcend has introduced an artistic addition to its JetFlash family of USB flash drives, the 16GB V90C. Featuring abundant storage space and a sleek

geometric pattern, the JetFlash V90C is aimed at fashion-conscious mobile storage users.

The front of the drive is laser-etched with distinctive geometric shapes that create a colourful 3-D illusion when light catches it at different angles. The drive features a cap-less design with a hidden USB connector, and comes with a fashionable metallic keychain.

Tiny yet spacious, the 4.8mm-thick V90C has a storage capacity large enough to hold up to 6552 pictures (based on 5-megapixel JPEG compression format) or 240 minutes of 1080p video, enabling business travelers and other users to effortlessly carry enormous amounts of data while on the move.

The V90C offers up to 15MB/s transfer speeds and is available in four capacities: 2 GB, 4 GB, 8 GB and 16 GB. The 16GB version costs Rs 3000.

MicroSD card

Kobian has launched Mercury MicroSD, strengthening its portfolio with mobile memory solutions. The new

microSD card offers increased memory capacity and compact formats required to enhance essential features such as MP3 playback, video-downloads and gaming.

Mercury MicroSD is available in all capacities starting from 2 GB to 64 GB. It's ideal for mobile phones with expansion slots and gives the ease of transferring phone lists, settings, music, video games or ringtones when you change the service or upgrade the handset. Its ultra-small size consumes very little power from the handset, giving you longer battery life on your phone.

LIGHTING

Waterproof, DC-powered LED spotlights

GlacialTech Inc. has introduced GL-SD60 series DC-powered LED spotlights. The GL-SD60 series spotlights

are dust- as well as waterproof (protected against strong water jets from all directions), which makes them perfect for both indoor and outdoor

lighting. Designed with an optional beam angle of either 30° or 60°, these are good for residential, commercial and industrial sites.

The GL-SD60 lights are powered by a DC source of 11-15V/22-30V, consume about 76 watts, have a typical

luminous efficacy of 46 lumens/watt, and last over 20,000 hours, liberating their owners from frequent replacement.

COMMUNICATION

Embedded IP-PBX server

Matrix SAPEX family of pure IP-PBXs brings IP telephony to SMBs and SMEs. The embedded platform integrates an SIP proxy, registrar and presence server in a compact hardware platform. SAPEX users can place voice and video calls over the IP network. Besides centralised call control and media relay services, auto-attendant, voice mail, all PBX telephony features and presence-based services are available to SAPEX users. Built-in RADIUS

and SMTP clients allow integration of advanced services.

The multi-functional IP-PBX de-

livers high performance. Simplified management, reduced communication cost, seamless connectivity with remote users and between geographically dispersed branches, advanced communication means and enhanced productivity are apparent benefits. The system employs open-standard SIP protocol and is therefore interoperable with SIP proxies, gateways and IP phones.

SAPEX is available in two models: SDM with support for 200 users and DDM with support for 500 users.
