POWER SUPPLY

VRLA batteries for telecom cell sites

Luminous Teleinfra has launched next-generation deep-cycle VRLA batteries for telecom cell sites. These specially designed deep-cycle applications provide reduced cost of ownership and usage and high energy storage in a small footprint. The batteries come with such features as minimal thermal runaway, reduced gassing due to patented alloy and minimal positive-plate corrosion leading to longer life.

e-bike battery

Artheon Electronics has launched a long-life, eco-friendly battery for e-bikes. The battery is easy to recharge and has high deep-cycle capability with low corrosion. It is free from PCL1, PCL2 and PCL3 effects. Oxygen recombination efficiency ensures that the battery lasts long.

TEST & MEASUREMENT

Inertial dynamometer

MEA Testing Systems, Israel, has introduced a new technology that delivers motor characteristics in seconds, eliminating the need to load the shaft. Within a fraction of the conventional testing time, you obtain precise and reliable results.

The system can detect such parameters as torque-speed,

torque-current and speed-current, friction torque, power-in and power-out, efficiency, torque at different temperatures, vibrations and oscillations, rotor and stator defect, insulation faults, magnetic faults, noise of the motor, back emf during deceleration, cogging torque, stator temperature and gear faults.

Oxygen analyser

KUSAM-MECO has introduced a multipurpose, life-saving oxygen analyser (model KM-5490) in an ergonomically designed case. The analyser uses a high-quality oxygen sensor, and is very precise. It has a 4-digit LCD with bright backlight and acousto-optic alarm. Oxygen measurement range is 0-25 per cent (vol.) with a resolution of 0.1 per cent (vol.).

The oxygen analyser operates off three 1.5V AAA-size alkaline batteries and finds use in oxygen manufacturing factories, petroleum refining and petrochemical plants, and oxygen content detection in trains, automobiles, mines and sealed places.

Indicating pointer-type frequency meter

The Mecov frequency meter is electronic type using a frequency-to-DC converter connected to a sturdy moving coil. Accurate, quick frequency measurements are possible without any noticeable influence of line-voltage fluctuation or waveform distortion.

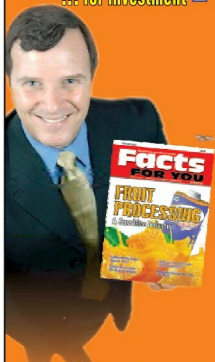

The meter is designed for standard frequency ranges of 45-50-55 Hz, 40-50-60 Hz, 55-60-65 Hz and 80-100-120 Hz. It is available
