3-D TV sales to grow 80 per cent by 2015

It may be in the early-adopter phase at the moment, but watching TV in three dimensions at home could become mainstream in two years. According to research firm iSuppli, 4.2 million 3-D TV sets are expected to be sold worldwide this year. The shipments will reach 78 million in 2015, rising at a vigorous compound annual growth rate of 80.2 per cent from 2010.

While Samsung is likely to sell the lion's share of 3-D TVs this year, Sony, Panasonic and LG Electronics are not far behind.

Netbook shipments to more than double by 2013

This year, almost 60 million netbooks are expected to ship worldwide. According to a forecast by ABI Research, almost double that number will reach global markets in 2013. This is the result of the rapid netbook market growth observed since the introduction of the new computer category in 2008—a trend which will start to

Steve Jobs, the smartest CEO in tech

In its list of '50 smartest people in tech,' *Fortune* magazine has picked Apple's iconic chief Steve Jobs as the smartest CEO. *Fortune* goes on to say that Jobs passed not one but four industries: music, film, telecom, and, of course, the computer industry. He is a visionary, a micromanager and a showman who creates such anticipation around new products that their releases are veritable holidays.

Fortune highlights Jobs' historic contributions to the tech world: 'When Steve Jobs returned to Apple in 1997 after a twelve-year exile, the company was close to bankruptcy. Thirteen years later it has a market cap of \$250 billion and is the world's most valuable tech company, transforming whole industries along the way. iTunes reinvented music. Pixar, now part of Disney, elevated animated films. The iPhone changed telecom. And the new iPad has other computer makers scrambling to respond.'

HCL's founder director passes away

S. Raman, one of the HCL fellow promoters and former president

and chief operating officer of HCL Technologies, has passed away.

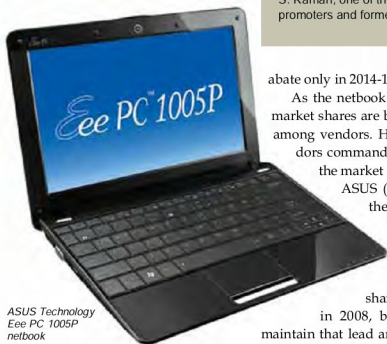

When HCL forayed into IT services business, Raman was responsible for architecting the business and translating the IT services vision to reality—a task that he did successfully as president and COO of HCL Technologies till he retired in 2005 on health grounds. He rejoined the company two years ago to lead HCL's and the Shiv Nadar Foundation's internal infrastructure projects.

Simmtronics appoints general managers

Simmtronics Semiconductors has appointed Kumar Rajan as general manager, PC and computing products, India & SAARC, and Virender Singh as general manager of motherboard division.

Prior to joining Simmtronics, Rajan was the national sales manager at HCL Infosystems. Before this, he was also associated with other brands like Zenith and PCS, among others.

Singh, prior to joining Simmtronics, was the country manager for Jetway Information. In addition to this, he was associated with companies like Samtel, Vintron, Asus, ATI and AMD.

ASUS Technology
Eee PC 1005P
netbook

abate only in 2014-15.

As the netbook market matures, market shares are beginning to shift among vendors. Half a dozen vendors commanded 78 per cent of the market in 2009. Acer and ASUS (which pioneered the whole netbook concept with its Eee PC) held almost equal one-third share of the market in 2008, but ASUS didn't maintain that lead and lost half of its

market share in 2009.

Mobile video services revenue to exceed \$2 billion

Revenue from mobile video services is expected to top \$2 billion worldwide in 2013, according to the latest data from ABI Research. Video services included in this forecast are video telephony, video messaging, video sharing, video-on-demand (VoD) downloads and other video services.

"Video services revenue will only amount to about \$121 million this year," says senior analyst Mark Beccue.
