

'DO IT YOURSELF' kits

Choose from a wide range of kits to support your creative ventures. Kits'n'Spares brings to you the kits, complete with components, circuits, PCBs, hard-to-find ICs and easy-to-use instruction manuals

NEW KITS

Microcontroller Based Solar Charger without Panel

Rs. 1000/-

This AT89C2051 microcontroller-based solar charge controller has built-in digital voltmeter for battery status indication on the LCD with various battery protection controls. This controller is suitable for 10-40W solar panels.

Microcontroller Based DC Motor Controller

Rs. 1150/-

It is an AT89C51 microcontroller-based DC motor controller which controls the direction of a 6V DC motor. LEDs and LCD display are used to indicate the status and operation of the motor.

Microcontroller Based Moving Message Display

Rs. 2150/-

The circuit presented here uses 16 common-anode, single-digit, alphanumeric displays to show 16 characters at a time using AT89C51 microcontroller.

Electronic Bicycle Lock

Rs. 140/-

The electronic Bicycle Lock described here is a worthwhile alternative for bicycle owners who want to make their bicycles 'intelligent' at reasonable price.

Professional Kits (Major)

Remote Controlled Land Rover

Rs. 3000/-

Make a land rover robot that can be remotely instructed to perform simple functions through an appropriate push-button switch on the remote control like move forward, backward, right and left.

Cellphone Operated Land Rover

Rs. 2500/-

In this project, the robot is controlled by a mobile phone that makes a call to the mobile phone attached to the robot.

Secured Room Access System

Rs. 1000/-

This microcontroller-based device is an access control system that allows only authorised persons to access a restricted area. The system comprises a numeric keypad, a solenoid-operated lock and LCD display.

Microcontroller Based Tachometer

Rs. 500/-

This is an easy-to-make photoelectric tachometer project for measuring the RPM (revolutions per minute) of rotating shaft, shop-floor tools and many household machines without any mechanical or electrical interface.

Hobby Kits (Minor)

Anti Bag Snatching Alarm

Rs. 220/-

The kit uses plug and socket arrangement to raise the alarm whenever any snatching attempt is made. Thus, while travelling, this kit entitles the person to carry cash or valuables without fear. Using the hidden key, only owner can turn off the alarm.

Remote Control for Home Appliances

Rs. 200/-

This handy circuit can be used to switch on and switch off any of your home appliances or any electrical device with a single press of your TV, VCD or DVD remote control.

Magic Eye

Rs. 85/-

This magic eye fitted on the bottom of door entrance obviates the need for a call bell. It can also be used as an automatic guest indicator at homes or as a burglar alarm in banks.

Automatic Low-Power Emergency Light

Rs. 450/-

The circuit has a white-LED-based emergency light which turns on automatically when mains supply fails, and turns off when mains power resumes. It is highly bright as it uses white LEDs.
