

Testing is Just a Fingertip Away

For Medical and General Electrical Equipment

LEAKAGE CURRENT TESTER

GLC-9000

The GLC-9000 Leakage Current Tester, is designed to fulfill the requirements of leakage current (or touch current) tests for the compliance of various standards including EN 60601-1 (IEC 60601-1) for medical electrical equipment, and EN 60990 (IEC 60990) for most of the IT products, home appliances and other electric and electronic devices.

The GLC-9000 is equipped with a 5.6" TFT LCD touch panel to provide a user-friendly operation environment, measurement setting information and the test result displayed on the LCD simultaneously. 50 preset of front panel setting, which conform to IEC 60990 and other popular standards, are stored in the memory for easy recall and operation.

FEATURES

- Leakage Current Test for Medical Electrical and General Electrical Equipment
- 5.6" Touch Panel with Color TFT LCD Display
- Various Measurement Networks to Simulate the Impedance of Human body
- Preset Test Condition Conform to IEC60990
