

Internet Utilities

Including mail client, RSS feed reader and Web browser

SeaMonkey 2.0.6 (Utility, 10.0 MB)

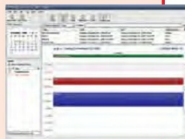

SeaMonkey is a community-driven software suite that contains an Internet browser, e-mail and newsgroup client with an included Web feed reader, HTML editor, IRC chat and Web development tools. With these sets of features, it is sure to appeal to advanced users, Web developers and corporate users. SeaMonkey Composer is a WYSIWYG HTML editor. Its main user interface features four tabs: normal (WYSIWYG), HTML tags, HTML code and browser preview. The mail client features include support for multiple accounts, junk mail detection, message filters, HTML message support, a dictionary and an address book. Powered by Mozilla, SeaMonkey uses much of the same Mozilla source code as used to power such successful projects as Firefox, Thunderbird, Camino, Sunbird and Miro.

Sunbird

(Utility, 6.6 MB)

A free, open source, cross-platform calendar application, Mozilla Sunbird is built upon Mozilla toolkit. Initially developed as a standalone version of the lightning calendar and scheduling extension for Mozilla Thunderbird, the software provides you with a full-featured and easy-to-use calendar application.

RSS Bandit (Utility, 10.0 MB)

RSS Bandit is a free application that allows you to read news feeds (both RSS and Atom feeds). It can also synchronise with your feeds in Google Reader and the Facebook news feed.

Thunderbird 3.1 (Utility, 9.0 MB)

Thunderbird aims to be a simple e-mail, newsgroup and news feed client. It is a feature-rich e-mail client that works on Linux and Windows. Migration assistant helps you set up fully customised Thunderbird. The import tools help you bring your e-mails, address books, and settings from your older e-mail program to Thunderbird without much hassle. Moreover, it supports a variety of themes for changing its overall look and feel.

FileZilla (Utility, 4.0 MB)

FileZilla is a cross-platform graphical FTP, FTPS and SFTP client that works on Windows, Linux and Mac OS X. It is open source software with features like site manager, message log, file and folder view and transfer queue among others. It is distributed free of charge under the terms of the GNU general public licence.
