

Enable Reliable and Integrated Communications in Substation Automation

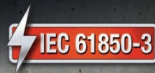

- IEC 61850-3 and IEEE 1613 certified
- Zero packet loss under EMI interference
- Rugged design for substations
- Maximum network reliability and availability
- IEEE 1588 PTP supported for Ethernet switches

IEC 61850-3
Zero packet loss
-40°C to +85°C

Substation Ruggedized Communication Products

Moxa offers a wide spectrum of ruggedized substation networking products that are specially designed to meet IEC 61850-3 standard. To ensure higher reliability, availability and uptime of substation communications, these products emphasize media and power redundancy, fanless operation over a wide temperature range, rugged features, and high EMI immunity.

PowerTrans IEC 61850-3 Ethernet Switches

Gigabit Modular Managed Ethernet Switches

DA-681 IEC 61850-3 Embedded Computers

Embedded Computer with Quad LANs and 18 Serial Ports

PTC-101 IEC 61850-3 Media Converters

Ethernet-to-fiber media converters
