

Gain more insight, measure real-time.

The R&S®FSVR real-time spectrum analyzer

The R&S®FSVR is the first real-time spectrum analyzer with complete all-round capabilities. It offers everything a conventional spectrum and signal analyzer does – plus real-time measurement functions. That means you're ready for anything, from broadband spectral analysis to the detection of very short sporadic interference signals. You get:

- Spectrum measurements with no time gaps, with 40 MHz analysis bandwidth and up to 30 (110) GHz
- Real-time functions including
 - Triggering on events in the spectrum (frequency mask trigger)
 - Persistence mode for fast evaluation of time-variable spectra
 - Spectrogram to show the spectrum versus time
- All the functions of the R&S®FSV signal and spectrum analyzer
