LED

MIC Electronics Limited, is a pioneer
in its Silver Jubilee year.

We've **LED** for **25 years** and
now a new light on the future

MIC Electronics, is the only Indian company, with **Design-to-Display** capabilities in True Colour LED Video Displays. Our clients are global, with exports to Australia, Middle-East, South Africa, Sri Lanka and USA.

Our R&D facilities, approved by DSIR, Govt. of India, has done path breaking work in Telecom, LED Lighting, LED Displays and a range of Embedded Technologies.

The strengths of MIC Electronics are attested through its patents ranging from Scan+ technology used in LED video walls, The Energy sector, Embedded Telecom Software and Networks Element Management solutions to Broadband Digital Loop Carrier on optical fiber

Having LED for 25years, MIC Electronics is now throwing a new light on the future with end-to-end products and solutions in LED lighting both grid and off-grid based.

We continue to drive innovation.
