LIGHTING

LED torches

GlacialLight has launched two LED torches (Dynamo LT103 and Palm-siren Dynamo 3 LT263) that have a long battery life (in some cases, up to 100 hours) and are much tougher

than traditional glass lamps. Both the torches are rechargeable with their lithium-ion batteries. After just two minutes of charging, the torch can operate for two to eight minutes. Other features include a portable USB charger and a mini USB power within USB cable.

SECURITY

High-resolution security camera

SparsH has launched a high-resolution security camera (Bravura 540 TVL OSD

series) that allows video surveillance in varying light conditions.

The new camera series is based on Sony Super HAD-II CCD technology and further improves the video quality of security surveillance to expand applications for security cameras. It has five-zone selective backlight compensation and privacy masking (which means you can hide any part of the scene by selecting that area). Highlight-suppress backlight compensation darkens the selected highlights and brightens up dark portions. It can be used, for example, to read a car number plate with headlights on. The onscreen display lets you set up various features of the camera, including colour, brightness, image stability (flicker) and automatic white balancing.

NAVIGATION

GPS receiver

rhdyoLABZ has introduced a highly sensitive GPS receiver that can provide accurate results at a fast speed.

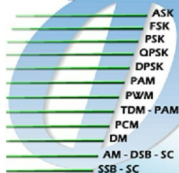

The receiver is made with a third-generation patch antenna on top (POT) GPS module. The built-in 3V-5V con-

verter enables it to interface with normal 5V microcontrollers. The module provides current time, date, latitude, longitude, speed, altitude and travel directions/headings besides other data and can be used in many applications including navigation, tracking systems,
