

per cent growth, respectively. According to industry experts, this industry will continue to register robust growth after the rollout of 3G and broadband wireless services.

"The investment in the telecom sector during the 11th Five Year Plan (2007-2012) is projected at \$77 billion. The revenue from mobile phone manufacturing is expected to reach \$13 billion by 2011. So there is an excellent growth opportunity for telecom equipment manufacturers in India," said Sajeew Nair, head of product management, telecom division, Matrix Comsec, at a two-day conclave organised by the Confederation of Indian Industry (CII) on multi-dimensional growth in the telecom domain.

Europe to invest in Indian solar power plants

The European Investment Bank has been roped by the Asian Development Bank (ADB) to invest in large-scale solar power plants in India. For the last few years, ADB has been working closely with the Indian government to devise overall policies and logistical support mechanism in order to make the solar energy projects commercially viable.

The bank would also provide capital grants to cover up the difference between the cost of solar power generation and the average cost of generation from conventional sources.

ONGC ventures into non-conventional energy sources

India's largest state-run oil exploration company Oil and Natural Gas Corporation (ONGC) plans to invest Rs 5 billion in R&D of non-conventional energy sources to achieve energy security for the nation.

Informed R.S. Sharma, managing director and chairman, ONGC, "ONGC has ventured into exploration of shale gas reserves, besides engaging in tapping non-conventional energy sources like solar, thermal energy, light-emitting diode (LED) and fuel cells that emit less carbon."
