

## BINAY- Lighting Up The Future

### BINAY LED

Aviation Obstruction Lights for:

- Industrial Chimneys
- Radio, TV and Structural Towers
- High-rise Buildings & Structures
- Airports and Airfields

Available In Low Intensity and Medium Intensity Versions (as per the International Civil Aviation Organization guidelines), BINAY's PATENTED LED Aviation Lights come with a 5-year Warranty.

### BENEFITS

- Rt-and-forget maintenance-free operation
- Long life of 100,000 hours (20 years at 12 hours daily burning)
- Shock-proof and vibration-resistant

**THE BINAY LED OBSTRUCTION LIGHT IS UNDER ACCEPTED PATENT, AND AS SUCH IS A PROPRIETARY PRODUCT**

## CAUTION NOTICE

Notice is hereby given to all concerned including the Manufacturers, Merchants and Traders dealing inter alia with "LED Aviation Obstruction Lighting Device" Our client, Kumar Krishna Rohatgi of Binay Opto Electronics Private Ltd. is the Patentee of Indian Patent No. 188995 of 9th May 1996 relating to "LED Aviation Obstruction Lighting Device". Therefore, it would not be lawful for any person without the written consent, of our client, to indulge in any act of MAKING, PURCHASING, USING (AS END-USER/CUSTOMER), OFFERING FOR SALE, SELLING OR IMPORTING such device in India during the subsistence of this patent.

It is further made known to all concerned that any unlawful act by any person would not be acceptable to our client, who may decide to take legal action against the infringers for such wrongful act in a Court of Law.

All concerned in the Trade and Commerce and hereby requested to contact the undermentioned address or any further details regarding the above and to avoid unnecessary litigation and/or legal proceedings.

cious energy.

The Cray XT5 'Jaguar' system at the US Department of Energy's Oak Ridge Leadership Computing Facility in Tennessee was ranked second with a speed of 1750 trillion calculations per second,

### World's first Android TV

Swedish TV maker People of Lava has launched a new TV called Scandinavia that runs the Android version 1.5 (cupcake). Claimed to be the world's first Android TV, Scandinavia comes with a remote control having a built-in keyboard. It allows you to do almost everything that a smartphone does - voice calls are an exception.

Scandinavia's home menu features widgets for Google Chrome, Facebook, YouTube and Google Maps. Besides, the set offers an application store for users to download additional content. "There are only 20 or so apps in the store at the moment, but there will be more than 1000 before year-end as it will be able to import many of the apps in the online Android Market store as long as they are scalable to fit a TV screen rather than a handset," said Martin Ljunggren, marketing director of People of Lava.

Its top-of-the-line 140cm (55-inch) model is available in Sweden for \$5820.

### Compliance test for DiVA standard

Tektronix claims to have introduced the industry's first physical-layer compliance test solution for the 'digital interactive interface for video & audio' (DiVA) standard, offering a complete test bench that allows engineers to optimise and validate the performance of their DiVA-compliant designs.

DiVA technology combines a reliable high-speed, bidirectional data channel in addition to an uncompressed video and audio channel to allow users to connect, configure and control various home consumer electronics devices from digital TVs. The Tektronix test solution gives DiVA design developers complete validation capability based on the Compliance Test Specification and supports a wide range of tests for transmitter, receiver and cable devices.

The DiVA test solution consists of a DPO/DSA/MSO7000 series oscilloscope with DiVA advanced analysis and compliance software. Additional components include an AWG7000 series arbitrary waveform generator, P7313SMA probes and DiVA test fixtures.

### Single-chip motor controller

High-performing motor drives for such equipment as security cameras, cash dispensers, ticketing machines, stage-lighting, printers and vending machines can now be realised more quickly, at lower cost and higher performance, using a complete motor-control system on a chip perfected by STMicroelectronics.

The 'digital SPIN,' or dSPIN, combines all the necessary digital control, analogue measurement and power
