POCKET-PERFECT SMARTPHONE

IN A COMPACT SQUARE, MOTOROLA FLIPOUT FITS NEATLY IN YOUR PALM, PURSE OR SMALL POCKET

Price: ₹ 16,990

Motorola has launched a stylishly square and pocket-perfect smartphone in India. The Motorola FLIPOUT runs on Android 2.1 and features an innovative square pivot design that opens to reveal a five-row QWERTY keypad with a separate row for numeric keys. It has up to seven customisable home screens, live wallpapers and added security for exchange server users.

You can personalise the FLIPOUT with bright expressive battery covers that come in licorice (black), fairway green, poppy red and white colours. The phone offers effortless communications as it easily switches between windows and continues with other tasks while the browsers run in the background.

For music fans, FLIPOUT has a connected media player that offers full-screen lyric support, integrated song ID and a social solution for knowing what people around you are listening to.

DIGICAM WITH 15X ZOOM

THE FUJIFILM FinePix F300EXR HAS AUTO-FOCUS SPEED AS FAST AS HUMAN EYES BLINK

Price: ₹ 20,999

Fujifilm India has launched a compact digital camera with 15x zoom. The FinePix F300EXR is equipped with the world's first phase-detection-pixel built-in CCD that realises auto-focus speed of 0.158 second—as fast as human eyes blink.

Pairs of phase-detection sensors placed on the EXR sensor work by receiving the incoming light of images and calculating the phase difference to find whether the object is in front focus or back focus position. This mechanism is the same as that of external sensors on DSLRs and realises an extremely fast auto-focus speed of 0.158 second. The benefit for the photographer is immediate: an almost instantaneous capture of the subject

in the frame, with no missed shots or subjects' half out-of-frame.

The F300EXR automatically selects between phase-detection and contrast auto-focus by measuring the amount of light or contrast in the scene. Phase-detection auto-focus is extremely responsive in good light, while contrast auto-focus is better in dark scenes.

The FinePix F300EXR sports the latest 12-megapixel version of the EXR sensor. Moreover, its high-quality 15x lens offers 24-360mm focal length.

HD WEBCAM

WITH LOGITECH HD PRO C910, WATCH THE PEOPLE THAT MATTER TO YOU IN BREATHTAKING DETAIL

Price: ₹ 7295

Logitech's HD Pro C910 webcam lets you record video in stunning Full HD 1080p and make video calls in fluid HD 720p. It also features crystal-clear stereo audio with two mics.

The webcam offers rich, 10-megapixel photos. At 25mm thickness, it adds a minimalist touch to your laptop or desktop computer setup. It's a snap to record and upload HD videos to Facebook or YouTube. The

included Magix photo and video editing software help you polish the rough edges before your video goes viral. Also, the included picture and video gallery makes it easy to store your memories.
