Tata DOCOMO launches 3G services

Tata Docomo, the GSM arm of Tata Teleservices, has become the first private operator to launch 3G services in India. Powered with cutting-edge technology support from its partner NTT Docomo of Japan, the global leader in 3G services, Tata Docomo's 3G services claims to change the way consumers use their mobile phones, riding on the back of game-changing products, applications and services. Its HSPA+ 3G network, set up with the assistance of NTT Docomo, supports high-speed Internet access with speeds of up to 21.1 Mbps. The network also supports high-definition voice for a superior voice experience on calls.

Nokia's Ovi music store makes music downloading fun

An absolute treat for music lovers, Nokia's popular music service Ovi Music Store has introduced the 'Ovi Music Shorties' offer in association with Hungama Digital Media Entertainment. The offer gives music lovers an opportunity to download 500 popular songs in 90-second format from the Ovi Music Store. Nokia's Ovi Music Shorties are ideal for those who are constantly on the move and like to listen to new releases every day. With the new shorter format, Nokia's Ovi Music Shorties will help consumers enjoy a greater variety of music through quicker and easier downloads.

Skype launches beta version for Mac

Skype has launched a beta version of its VoIP software specially designed for Mac users. Skype 5.0 offers simplified navigation where the app is brought together into a single window for easier usage. It also offers group video calling that enables video calls between two or more people as long as everyone is using either Skype 5.0 for Mac or Windows 5.0. The Mac address book allows users to call, IM and SMS their contacts whether they are online or not. A new call-control bar which sits atop a webpage or document allows users to mute calls and hang up.

FULL-HD LED MONITOR

VIEWSONIC'S VX2250WM LED MONITOR PROVIDES UP TO 40 PER CENT ENERGY SAVINGS

Price: ₹ 8999

Viewsonic's 56cm (22-inch) VX-2250wm LED monitor is ideal for those looking to lower their energy usage without compromising on

the picture quality and advanced features. The monitor has a slim, sleek design and powerful 1920x1080 resolution for crystal-clear quality. It provides a stylish and sophisticated display while simultaneously providing up to 40 per cent energy savings over a

typical 56cm monitor.

The VX2250wm is designed to create a complete multimedia experience. With integrated stereo speakers, DVI and VGA inputs, it combines precise images with powerful sound.

GAMING LAPTOP

TARGETED AT PROFESSIONAL GAMERS AND SERIOUS ENTHUSIASTS, THE MSI GT663 INCORPORATES NVIDIA'S MOST ADVANCED GRAPHICS CARD

Price: ₹ 149,999 onwards

Micro Star International (MSI) has unveiled its latest offering for the gaming enthusiasts—the GT663. The powerful new notebook is an addition to MSI's G-Series (gaming) laptops and comes equipped with GeForce GTX 460M (1.5GB GDDR5)—nVidia's most advanced discrete

graphics card—to support DirectX 11 for a crisp, clear display.

So in a battlefield game, you can see individuals off in the distance or hidden in dark corners in great detail and also their eyes, facial features and clothing. In addition, the GTX 460M fully utilises each processing core in the GeForce GPU, allowing the nVidia PhysX software to more faithfully reproduce the universe of your choice with collapsing walls, shattered glass all over the floor and even water that changes shape with the influence of external forces.

The laptop's gaming power is enhanced by the latest Intel Core i7 quad-core CPU with Intel Turbo Boost, as well as three DDR3 memory slots for a maximum of 12 GB of expandable memory.
