

DISPLAY

HP DreamScreen Multifunction Screen

A single device for the entire family, with information, entertainment, education and communication at their fingertips

Price: ₹19,999

plus taxes, exclusively for Airtel and Tata subscribers

The DreamScreen touch-screen display from Hewlett Packard (HP) offers a complete entertainment package affordably through the Internet—like education, video chat, music, movies, news, browsing, temple *darshans* and much more.

To deliver an interactive experience that is tailored for India, HP has collaborated with leading, best-in-class Indian content and service providers to create an immersive experience for all members of the family. These include companies like Airtel and Tata Teleservices for providing Internet connectivity options, Apalya for *darshan*, Bill Desk for paying bills online, Edurite for education, Hungama for music and movies, India Games for thrilling games, India Today for media content, Music Today for music, NDTV for news and daily astrology, Tata Communications for live *darshan* and Yatra for booking air and train travel.

Addressing the language barrier, information on HP DreamScreen is accessible in Hindi and English.

TABLET

Dell Streak Pocket Tablet

Watch, listen, play and connect with a 12.7cm high-quality screen that fits perfectly in your hands

Price
₹35,000

The Dell Streak touchscreen device not only functions as a tablet PC but also lets you make and receive calls. The Android-based Streak includes a 12.7cm (5-inch) multi-touch capacitive display with a resolution of 800x480 pixels. The screen lets you watch movies, stream videos from YouTube, surf the Web and stay connected, with less squinting and pinching. In addition, the tablet comes powered with Qualcomm's 1GHz Snapdragon 8250 mobile processor and internal storage of up to 2 GB (expandable up to 32 GB).

According to company sources, the 3G tablet has a 5-megapixel auto-focus camera with a dual LED (light-emitting diode) flash and a front-facing camera for video chat. Besides, the tablet features Wi-Fi and Bluetooth. The good thing is that, unlike its counterparts in the Indian market, it is readily available.
