Seagate GoFlex Hard Drives

Protect, store and do more with multiple interface and content sharing options of these hard drives

Price

GoFlex ultra-portable: ₹ 4200 for 320GB,
₹ 4999 for 500GB, ₹ 9000 for 1TB
GoFlex Pro ultra-portable: ₹ 5999 for
500GB
GoFlex Desk external: ₹ 6000 for 1TB,
₹ 9000 for 2TB

Seagate's FreeAgent GoFlex plug-and-play portable and desktop drives easily adapt to the interface or device being used, with an array of interchangeable cable and desktop adaptor options. These hard disk drives work with both Microsoft Windows and Mac OS-X computers.

The seamless GoFlex cable system enables the GoFlex and GoFlex Pro ultra-portable USB 2.0 drives to be upgraded to USB 3.0, eSATA or FireWire 800 connections simply by switching out the cable adaptor. Additionally, specially-designed GoFlex upgrade cables provide even more applications of how each drive can be used. For example, the GoFlex Upgrade cable for auto backup transforms the drive into a continuous full-system backup, giving consumers the peace of mind that their files and system settings are backed up, while leaving the remaining capacity for basic drag-and-drop file transfer.

The drives come in capacities ranging from 320 GB to 2 TB.

The GoFlex ultra-portable drive is available in 14.5mm and 22mm versions, and includes a USB 2.0 cable. The GoFlex Pro ultra-portable is a 7200-rpm, 6.4cm drive that delivers premium backup with encryption and includes a USB 2.0 cable. The GoFlex Desk external drive kit delivers high-capacity storage and automatic, continuous backup with encryption for all your files and includes a USB 2.0 cable.

SPORTS WATCH

Garmin Forerunner 210 GPS Watch

An easy-to-use runner's companion that will keep your training on track

Price: ₹ 19,000 plus taxes
(For Standard Bundle Version)

This GPS-enabled sports watch will suit you if you are an improving runner. It accurately records your time, pace, distance and calories burned. For runners who want more training capabilities, Forerunner 210 lets you create customised interval sessions and see your pace for each interval.

The watch also comes with a soft strap heart rate monitor and allows you to customise heart rate zones and alerts. Once your workout is done, you can upload to Garmin Connect to analyse, store and share your data, see the route you traveled on a map and even create goals.

For outdoor runs, Forerunner 210 uses GPS to accurately record your time, pace and distance. To track the same data at the gym, simply snap the footpod (included with some models, sold separately on others) on to your shoe and you are ready to go.

The watch runs on a rechargeable lithium-ion battery, which lasts three weeks in power-saving mode and eight hours in training mode.
