SatNav launches entertainment device with navigation

SatNav Technologies has launched an entertainment device with navigation, video, audio and photo features. The SatGuide Moov200 has a SiRF StarIII GPS chipset that comes with Instafix technology to help locate the position in the shortest possible time. It has a 2GB memory and can play all file formats.

Freescape ICs feature in Acer's new monitor

The DisplayPlus D241H smart monitor from Acer will include Freescape's high-performance and feature-rich i.MX515 applications processor to enable widget applications and multimedia playback. It also incorporates Freescape's MC13892 power management IC and SGLT5000 audio codec.

mBit rolls out mobile P2P app

mBit Infotech has rolled out a peer-to-peer (P2P) application service that enables users to use different mobile applications like media sharing, search and download from mobile phones of the same peer. In addition, the search option in the application allows users to search for advertisements and music/video sharing with existing mobile content store.

Netgear WNR1000 wireless router for better wireless coverage

The WNR1000 RangeMax 150 is the latest wireless router in the Netgear stable with multiple advantages for home and SOHO users. It provides better wireless coverage than older Wireless-G routers, and boosts performance when connected to Wireless-N devices. You can surf, e-mail, stream music, play on-line games and make Internet phone calls.

iVdopia introduces revolutionary Talk2Me ads on mobile platform

On the heels of becoming the first ad network and platform to introduce pre-app and in-app video ads for the iPhone, iVdopia's Talk2Me introduces a completely extensible way of customising ad interaction according to brand. With Talk2Me, users can engage with their favourite brands on their iPhone as they take advantage of iVdopia's share respond interact interface.

SLIM QWERTY MOBILE

ZEN MOBILE'S Z77 PROMISES EXCELLENT FEATURES AT A REASONABLE PRICE

Zen Mobile has launched a sleek mobile phone (Z77) aimed at today's tech-savvy youths.

Features and USP.

The Z77 is equipped with an opera mini browser that delivers quick and hassle-free browsing, while its 5.6cm (2.2-inch) screen allows easy Internet surfing. You can watch movies and videos on the wide screen as it offers the benefit of real MP4 playback and recording. Special moments and memories

Price: Rs 3299

can be captured with the 1.3MP camera. Also, you can keep track of your daily life with reminders of appointments, birthdays and the latest events with notes. Other impressive features include dual SIM facility, MP3 playback, wireless FM radio, expandable memory, headphones or attached speakers, and Z77's nimbuzz where all the instant messaging applications appear on the screen at one time and each can be accessed simultaneously.

DUAL-SIM PHONES FOR PROFESSIONALS

THE INTEX IN 6622 IS A TOUCHSCREEN PHONE WITH 7CM DISPLAY, WHILE ISMART IS A QWERTY PHONE

Intex has come up with two dual-SIM mobile phones—IN 6622 and iSmart.

Features & USP. The IN 6622 is a dual-SIM, touchscreen phone with 7.1cm display. Its SIM lock al-

lows users to password-protect their handset. Other features are 2GB expandable memory, 2MP camera, FM radio, Bluetooth, and audio and video player.

iSmart is a QWERTY phone that claims to make Internet browsing much easier and comes with expandable memory of up to 4 GB. Both the phones

are aimed at professionals who usually keep two handsets—one for interacting with customers and the other for communicating with friends and family members.

Price:
IN 6622—Rs 4800
iSmart—Rs 4600
