

GO FOR A GREEN GADGET THIS VALENTINE'S DAY

More interesting and exciting solar products are being introduced in the market—from a solar mobile to a solar shaver, solar candle or solar headphone. Take a look at these. You might just find what you are looking for and contribute to the common cause of preserving the environment

■ SRABANI SEN

A handbag or a bottle of perfume has become a common valentine gift. Why not think innovative this Valentine's Day and try gifting some amazing solar-powered gadget? We have entered 2010 with great expectations about futuristic gadgets that will be available to us. While flying cars and talking robots may still be out of our reach for most, solar gadgets are slowly becoming intertwined into our everyday life.

When it comes to solar power, people usually think of a solar power plant or rooftop panels. An increasing number of portable solar power products are coming up in the market that are handy and eco-friendly. Of course, calculators and alarm clocks have been solarised for decades. Now more interesting and exciting solar products are being introduced in the market—from a solar mobile to a solar shaver, solar candle, solar headphone and many more. Take a look at these. You might just find what you are looking for and contribute to the common cause of preserving the environment.

Samsung India had launched the world's first solar-powered mobile phone—Solar Guru (Guru E1107)—in the Indian market last summer. This handset enables users to charge the battery anywhere the sun is shining.

"Solar Guru has been developed keeping in mind the needs of Indian consumers, especially customers residing in areas where the electricity sup-

Samsung Guru solar phone

ply is unstable, so that they can rely on solar charging to remain connected," states Ranjit Yadav, director, mobile and IT business, Samsung.

Samsung Solar Guru comes in a compact design with an extended solar-powered battery and features like FM radio, MP3 ringtones, embedded games and a powerful torchlight. It also provides 'mobile prayer'—a specialised feature for different religions

that includes religious prayers and wallpapers. It is priced at Rs 2799.

You can also go for Sanyo's Eneloop solar light, which taps into sunlight with Sanyo's proprietary high-efficiency HIT solar cell technology, originally developed to be used as rooftop solar panels. "With Eneloop solar light, Sanyo aims to maximise usability, portability and longevity of solar energy, made possible by built-
