iPhone 3Gs

iPhone is one of the Apple's most talked about products. It can be thought of as three products put into one – a wide screen iPod, mobile phone and a great Internet tool. Apple's iPhone 3Gs has better performance as compared to its iPhone 3G. It is said to be 2x faster than iPhone 3G. Because of its improved features, it can now launch its applications a lot faster. It also has improved 3D graphics. Other features that it offers include video recording, 3-megapixel camera, voice control, digital compass, cut, copy and paste, MMS, spotlight search and landscape keyboard.

With the video camera, you can record video and edit them at your will by using the software available with the phone, and also upload them on Youtube and share them with friends. The still camera lets you capture pictures at a great resolution. Voice control is indeed a great feature that is incorporated in the iPhone 3Gs. The phone also has an in-built compass. Using the compass you can sail your way and always find which pole you are pointing to. One of the best features that iPhone 3Gs provides is the cut, copy and paste feature. This is indeed a very important feature when you are constantly accessing the net using your mobile phone. Using this feature, you can copy a portion of text and paste it at the desired location. The model comes with a touchscreen, hence no external keyboard is available. Rather, you can get a landscape or normal keyboard. You can search all your content on your phone just by logging into one application—spotlight search, as it gives you a great interface to surf the net.

Cost: Rs 45,000 approx.

Warranty: 1 year

Availability: Bharti Airtel and Vodafone Store

to carry along your favourite songs and pictures then memory cards help you do this. The cost of 1GB flash card or memory card is approximately Rs 1200.

Bluetooth headset. It is a useful accessory that usually comes handy when you are driving. Smart phones are generally bulky in comparison to normal phones. So, if you feel that it is cumbersome to hold your smart phone, you can use a Bluetooth headset instead. Most of the smart phones

today support Bluetooth. So, compatibility is not an issue. Moreover, if you like to listen to music on the move, you can buy Bluetooth headsets that are designed to meet multimedia needs. The cost of these headsets ranges from Rs 1200 to Rs 9000 approximately.

Screen protectors. One of the most fragile and expensive part of any phone is the screen. In case of smart phones with touchscreen, it becomes
