Motorola Moto ZN300

Motorola has recently launched a new series of smart phones. I have picked MOTO ZN300 as it is a smart phone for all and fits everyone's budget. It is a stylish multimedia phone with sleek look. This mobile weighs only 103 gm and has a 240 x 320 QVGA display. It is basically a slider phone with 3.1-megapixel camera with LED flash and 8x zoom.

The device comes with Bluetooth, which enables wireless transfer, sharing and printing of pictures. Further, you can use Bluetooth to transfer data to and fro from Bluetooth-enabled devices. The in-built memory of the phone is only 8 MB, which is expandable up to 32 GB MicroSD. The multimedia software of this phone supports various formats like mAAC—MP3, H.263, MPEG-4, WAV, WMA9, WMA10, etc. The web browser that you can use to browse the Internet is Opera. The phone also comes with certain preloaded social networking software such as Facebook. The device also comes with a USB 2.0 high-speed connection, which enables transfers 15 times faster than traditional USB 2.0 full speed. Lastly, the battery backup of this mobile is 435 minutes of continuous usage time and the standby time up to 400 hours.

Cost: Rs 7999

Warranty: 1 year

Availability: Through Motorola dealers and retail stores

all the more important to provide a proper safeguard against scratches and dust. Thus, screen protector is another useful accessory for smart phones. These come in various thickness, levels of transparency and price range. However, some users are not comfortable with screen protectors, especially in touchscreen phones. So, a good-quality screen protector with less thickness could be the solution to their problem. These cost you Rs 50 to Rs 200 approximately, depending on the size, quality and brand.

Charging cables. It is cumbersome to carry the charger of your mobile phone all the time. A smart accessory like USB charging cable can be a solution to this problem. You can connect

one end of the USB cable to your smart phone and the other to your laptop or desktop if you wish to recharge your handset.

Besides above-mentioned accessories, you can also look out for extra batteries, portable keyboards, pouches and cases. Extra battery will help you remain connected even after the primary battery has discharged. Portable keyboards are helpful for those who work on lengthy documents on their smart phones. Lastly, with pouches and cases you can carry your mobile phone without worrying about scratches and occasional drops. ●
