

should have direct interface with the Prime Minister's Office (PMO), says the task force's report submitted to the union minister for communications and IT, A. Raja.

The panel also demanded extension of section 10A/10B after the direct tax code is introduced next year. The report recommends sector-wise policy recommendations for IT exports, electronics manufacturing and domestic IT-BPO services.

The Task Force was set up by the ministry of communications and IT, government of India in August 2009.

Supply Chain expo held in Chennai

ELCINA recently organised Source India—Electronics Supply Chain in Chennai. The event was a focussed effort to encourage local manufacturing, value addition and local content in electronics equipment manufactured in India.

Source India was supported by department of information technology, government of India, Nokia and national electronics industry associations including CEAMA, MAIT, ISA and IPCA. At Source India, local and international manufacturers of electronic equipment, components, parts and consumables gathered to identify opportunities for servicing the requirements of the Indian and global market.

Industry leaders and CEOs from Nokia, Dell, Moser Baer, Amphenol, C-DOT, Tyco, Dixon and more shared their experiences during the conference on how to grow manufacturing, value addition and the importance of a local supply chain for achieving leadership in electronics.

Havells enters LED market

Havells India has entered the light-emitting-diodes (LED) market. The company has set a target of one billion rupees sale from LED segment in the next two years. It has set up a lighting R&D centre at its existing plant at Neemrana, Rajasthan for the purpose. The LED product range of the com-

pany, called Endura, would include spotlights, downlights, commercial lights and street lights.

The company is committed to developing energy saving devices which at present include CFLs, lighting, fans, motors, capacitors, cables and digital lighting control systems. Havells intends to have 80 per cent of its turnover from the energy savings products by 2012.

Microsoft, Convergys set up community technology centre

Microsoft and Convergys Corporation have opened a community technology centre (CTC) in Bengaluru. The CTC aims to increase computer literacy and develop the job-related technology skills of underprivileged children in Bengaluru.

The centre will be equipped with computers, printers, Internet access and teaching aids. It will steadily increase its outreach with the aim of inducting close to 1,000 students from primary schools and non-profit organisations.

The joint Microsoft/Convergys

creating a knowledgeable talent pool and making it the largest R&D centre of Infinera outside USA.

IBM bags National Award

IBM has received National Award from government of India for its technology innovation Spoken Web. The technology helps people who have little or no literacy, or are visually impaired, get the benefits of the world wide web by creating a parallel system similar to the Internet.

This voice-enabled technology enables physically challenged people to have access and share information, do business transactions, or create social networks by creating 'VoiceSites' through their mobile or landline phones.

PCI bags CII National Award 2009

PCI Ltd has bagged the Excellent Energy Efficient Award 2009 at the recently held CII National Energy Summit. The company got the award for the 'Diesel Rotary UPS systems/Battery-less UPS systems' under Energy Saving Product 2009 category.

programme will have a significant impact in creating new avenues for social and economic opportunities for local students from the higher primary school and other organisations.

Microsoft creates server and cloud division

Microsoft has created a new organisation within the server and tools business (STB) that combines the Windows Azure group with the Windows server and solutions group, into a single organisation called the server and cloud division (SCD). According to Microsoft, this move better aligns the company's resources with its strategy—creating a single organisation focussed on delivering solutions for customers that span on-premises data centres and the cloud.

The Windows Azure development team will move from under Ray Ozzie, chief software architect, to Bob Muglia, president, server and tools business. Amitabh Srivastava, senior vice president, will lead the newly formed server and cloud division, reporting to Bob.
