

Why

you should know more about

batteries

Most power backup problems are caused by the battery, not the UPS.

Selecting the battery carefully can cut total cost of ownership, reduce power consumption and help save the environment.

To know more about choosing the right battery for your needs visit www.relicellbattery.com

VRLA and Tubular batteries

VRLA Batteries - 12V 7AH to 250 AH
Tubular Batteries - 12V 100AH to 210 AH

- Part of a Rs.1000 crore IT industry group
- Tested and certified by Central Power Research Institute, Bangalore (CPRI) and Electronic Test and Development Centre (STQC Directorate, Ministry of Information Technology, Govt. of India). Download Test Certificates at www.relicellbattery.com
- UL Certified
- VRLA Batteries approved and registered in DGS&D for government purchases
- 45 Service Centres across India

Wanted Timer Circuits

I have been a regular reader of EFY for the last 20 years and have benefited a lot from it. Please publish construction project of a timer for controlling electrical appliances using Atmel 89S52 to control up to six loads. Another circuit I would like to suggest is of a school timer using PIC or Atmel microcontroller. Previously published project (using Motorola chip) built by me is not functioning properly.

S. Surendra Reddy
Through E-mail

EFY: We have noted your request. We will try to publish your requested circuits in our future issues.

Solar Charger

I want to assemble 'Microcontroller Based Solar Charger' project published in September issue. Kindly let me know the cost of all the major components like solar panel, microcontroller, ADC, etc. Please also inform me from where I can purchase these components.

Chitresh Goyal
Dehradun

EFY: You may contact our associates Kits'n'Spares to get the rate list of major components for the project. For solar panel, you may contact A.K.W. Electronics, New Delhi, on 011-41406775. To know the availability of solar panel nearest to you, please check www.eleb2b.com.

Circuit for Publication

I have developed an interesting circuit and would like to publish it in EFY. So please tell me how to proceed?

Aijsh Alfred
Palakkad, Kerala

EFY: You may go through the guidelines for contributors on our website at <http://www.electronicsforu.com/electronicsforu/articles/WI-EDT.pdf>

For Hobby

I am an electronics engineer presently working in the software field. I wish to take up electronics as my hobby and try out circuits suggested by your magazine, but I do not know where to purchase the necessary hardware. For example, I would need soldering iron, multimeter,

or an oscilloscope. Could you suggest me from where I can get these tools?

Ashish Mathur
Gurgaon

EFY: Please contact our associates Kits'n'Spares 011-26371661 or kits@efyindia.com and also check on www.eleb2b.com.

Circuits for Robotics

I like EFY and have gained a lot of knowledge by reading it. I will be grateful if you could provide me some circuit diagrams for robotic projects.

Divyang P. Joshi
Vadodra

EFY: You may refer to the circuits of the most recent projects: Automated Line Following Robot and PC-Based Mobile Robot for Navigation, published in September 2009 and October 2008 issues, respectively.

PIC and AVR-based projects

I am unable to register at your website, so kindly send me the details and circuits of the projects based on PIC and AVR or GPS systems.

Sneha Walia
Chandigarh

EFY: EFY has a number of websites. Please mention the name and the problem faced by you while interacting with our website. It will help us in improving the website. Some of the projects based on PIC and AVR published in our previous issues are:

1. PIC 16F84 Based Digital Thermometer (February '07)
2. Dynamic Temperature Sensor and Controller Using PIC (September '04)
3. PIC16F84 Based Codeless Device Switching System (August '04)
4. PIC Programmer for PIC16X8X (September '02)
5. Generator PIC16C84 Microcontroller R-2R D/A (October 2000)
6. AVR Microcontroller Based Clock (May '06)
7. Using AVR Microcontrollers for Projects (January '06)
8. Programmable Timer Based on AT90S4433 AVR (June '05)
9. Standalone Scrolling Display Using AT90S8515 AVR (January '05)
