

“Get your PCB Prototyping on the Right Track”

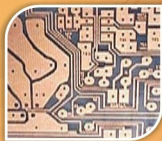

Scientech Technologies PCB Prototyping Machines brings you the Simplest, Quickest and the most precise way to make your own PCB. You can make Single/Double sided PCB in no time, Just input your Gerber files generated from any PCB designing software and watch your design coming alive!!

Features

- Small volume, Easy setup
- Machine works without requiring a computer
- High accuracy, Lower price
- Integrated sound/ dust enclosure
- Integrated micrometer depth controller
- Easy to use Membrane Switch Panel
- Motorized Z-axis with software control drill speed

Caddo 71

Training & Lab setup assistance
will be provided

TINA

Circuit / PCB Design and
Simulation Software
