

"I need to achieve profit goals and control costs."

Fast, lean and ready to adapt.

Pressure to control costs is increasing. But so is pressure to deliver faster. Agilent's new CXA signal analyzer helps you do both, whether for product development or manufacturing testing. It's the quickest analyzer in its price class. One-button channel power, ACP, OBW and SEM* measurements speed design and test results for greater yield. And it's one of the new future-ready test tools in the Agilent X-Series spanning instruments, measurements and software. That's flexibility to run lean today and upgrade as needed. Spec Agilent, and expect more.

The NEW Agilent CXA signal analyzer (N9000A)

-157 dBm DANL for fast spur search

70 standard-specific formats with 89600 VSA software

Simultaneous detectors, trace math and up to 12 markers

EMC, analog demod, phase noise, noise figure applications

Unlock additional capabilities with an easy license key upgrade

The Power to Get to Market Faster

* Adjacent Channel Power, Occupied Bandwidth and Spectrum Emission Mask
