

this next-generation technology. Some experts like Jaswinder Ahuja, corporate VP and MD, Cadence, however, are raising a demand for 4G platform.

Automobile gears up for growth

The automobile sector is one of the segments affected by the economic downturn. This scenario may be reversed in the coming year. About 80 per cent of the respondents strongly recommended automobile as a major growth-generating sector. Almost all international players in the two-wheeler segment have started their operations in the Indian market, which already has very strong domestic players. "Our new product range targets two-wheeler and three-wheeler segments," says Venkant Reddy, GM-Operation, Axiom.

The 'Nano' story indicates the strong demand for small and affordable

Innovative products in existing and new markets will drive the electronics industry. The areas which are potential for Indian electronics industry to leapfrog are— wireless connectivity, smart meter and energy efficient product ranges, affordable healthcare devices, digital classrooms, radio integrated surveillance systems for security and, obviously, low-cost zero emission cars."

ing front. India plans to spend at least \$30 billion till 2012 to modernise military by purchasing 126 warplanes, ships, submarines, artillery and other hardware. Sharadhi Chandra Babu P., vice president (corporate), business development and technology, Axis Aerospace and Technologies, expects

more than 26 per cent) is likely to open up enormous growth opportunity for the Indian strategic electronics sector."

"Military and aerospace segments have also been initiating significant investment in segments like rotary engine for UAVs, radar and RF technology," states Naresh Narasimhan, country marketing manager, Tektronix India.

Following the rise in terrorism, the chief concern for investors, managers and business owners is to make their security systems more compact. This concern is driving a huge demand of cost-effective total security solutions. According to respondents, access controls will see the quickest gains, and alarm and CCTV segments will rebound along with new housing construction. As per K. Tarun Singh, GM-projects, A V security systems, automatic explosive detector with 3D surveillance, robotic guards and elec-

With the plan for deployment of 20,000 MW solar power by 2022 and government incentives of 900 billion rupees, Solar Mission will be the key growth driver for Indian solar industry. Grid connected solar will see highest growth."

—Gurjit Bharrara, Business Head (Northern Region), Reliance Industry Limited, Solar Group

cars in India, especially in Tier-II and Tier-III towns. Possibly, the 'Indianisation' in true sense will help to expand this market. "Taking inspiration from Nano, if we start building more products, they are bound to be successful anywhere in the world. This is because the India-centric products are designed keeping many constraints in mind along with high demand. Such products will surely work well in any other part of the world," says Jayaram Pillai, managing director-IndRA (India, Russia and Arabia) of National Instruments.

Strategically chosen option

Around two-third of the respondents chose strategic segment as the emerg-

at least one third of the total defence budget to be spent for capital acquisition. "This unprecedented increase along with a restriction of FDI (not

Cellphones, power supplies in telecom; STB, DTH, TV, DVD in consumer segment; bar code, RFID, unique ID, systems in security and defence electronics products have high market potential. 80 per cent of them are still being imported as CKD. SKD manufacturing therefore provides opportunities to Indian manufacturers."
