

ADVERTORIAL

Components & Materials

Persang Alloy Industries

Established in 1989, Persang Alloy Industries (PAI) is one of the largest manufacturers/exporters of solders, soldering chemicals and alloys in India. Based in Vadodara, PAI is TUV Rheinland-certified ISO 9001:2000 company. Its international certification and innovative research and development activities have made it the perfect solder solution company.

Products: Its wide variety of solders, lead-free alloys and fluxes find applications in a large number of critical tasks performed in electronics, electrical and automobile industries.

International collaboration: In 2006, PAI joined hands with international solder giant, Shenmao Technology Inc., Taiwan, to embark on a mission of producing world-class solders for the global market. Having a common environmental concern towards developing safer soldering materials, PAI and Shenmao Technology are committed to develop a new range of 'green' solders.

Technological edge: Always at the forefront of developing products with technological edge, PAI is the first solder manufacturer in South Asia to get the UL-RoHS

compliance—a strong reminder of its policy—'We Care for Your Tomorrow'. PAI has a state-of-the-art manufacturing plant in Vadodara and is equipped with the latest imported equipment to produce safe and superior quality solders for industrial use.

Latest offerings: PAI's latest introduction is the 5S alloy. Technically named as quinary alloys, 5S alloys are composed of Sn, Ag and Cu with Ni and Ge as additions, thereby making the company's solders most formidable ones. These solders are also the first in India to be carrying US patents. The latest addition to this peerless range is the SP-604 alloy, which is a low-cost quinary alloy and one of its kind available in the market.

Unified Electro-Tech Ltd

Established in 2006 by a group of technocrats, Unified is now a familiar name in Indian defence, aerospace and telecommunication sectors. Since the company's inception, it has grown rapidly to become a trusted partner for the defence and aerospace design and production houses in India.

The company's branch offices are strategically located at Mumbai, Delhi, Ahmedabad, Hyderabad, Chennai, and its corporate office at Bengaluru.

Products: Unified is exclusive representative/distributor of the following product lines from around the globe:

- MIL/QPL-qualified RF cables and connectors
- MIL/QPL-qualified Rotary Switches
- AC-DC, DC-DC converters
- RF and microwave components and subsystems
- Military and Tactical antennae
- Active and passive components
- Crystals, oscillators, VCO's and TCXO's
- Microelectronic packages
- LCD display products
- EMI filters
- Feed thru capacitors

- Chip beads
- RF absorbers
- EMI/EMC shielding materials
- Gaskets
- Enclosures
- Backplanes for VME
- VXI and PCI and cPCI products
- GaAs MESFETS
- PHEMTs
- MFETs, and MMICs
- Push button
- Toggle
- Rocker switches
- Industrial joysticks
- FRDs
- Bridge rectifiers
- APDs, SI diodes
- TVS diodes, LEDs
