Unleashing New Opportunities for the Electronics Industry

■ SANDHYA MALHOTRA

EFFY Enterprises organised the EFY Summit 2009, a first of its kind event, where leaders from the Indian electronics industry gathered under a single roof at Le Meridien, New Delhi, on December 16, 2009. The consensus reached by the panelists was that the Indian electronics industry has tremendous opportunity for growth, and therefore the need of the hour is for the government and the industry to work hand-in-hand for the growth of the industry.

The introductory address by Ramesh Chopra, managing director, EFY Enterprises, and keynote address by R. Chandrashekhar, secretary, department of information technology, government of India, aptly captured the flavour of the summit – 'Unleashing New Opportunities for the Electronics Industry'. Taking the subject forward, the panelists who represented a vast range of verticals, brought forth an insight into the varied developments, highlighted the contemporary issues and opportunities for Indian electronics industry, and shared solutions and take-away strategies for the benefit of the audience. The industry not

only discovered 'where' and 'how' to expand business but also the untapped markets and product segments. The summit helped identify actions that can change the industry's fortunes.

The entire panel discussion was designed to help senior business decision makers in unleashing new opportunities and figuring out strategies for tapping them. The summit was divided into four sessions – Emerging Markets in India: The Untapped and Upcoming Business; Made in India: Design Challenges and Innovativeness; The Electronics Ecosystems in India: A Bird's Eye View; and How and Where to Get Funding and Finance. Panel speakers represented the government of India and companies like Cadence Design Systems, Reliance Industries, IMRB International, Regnant, IIT Delhi, Bharat Electronics, Su-Kam Power Systems, Aplab, Juki India, Amara Raja, SanShadow Consultants, ICT Consultant and Religare.

India needs to set benchmark

Addressing the electronics fraternity, Ramesh Chopra gave food for thought and put forth important questions to them. "Can India afford to continue importing electronics goods?
