

3. Save the recorded file (here I have pressed key '3' on a remote control used for Sony TVs)

I have saved the file as 'key3.'

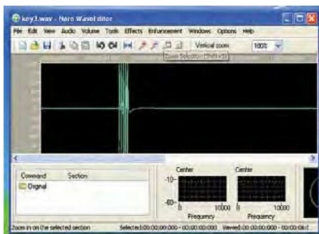

4. Open Nero WaveEditor application

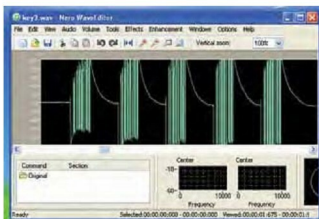

5. Open the file 'key3'

6. You can see the spectrum now

7. Zoom into spectrum

You can see a display formed due to multiple key-presses. (Here you see five pulse trains.)

8. Delete duplicate pulse trains and zoom to get a good view of the entire pulse train
