Samsung unveils smartphone platform

Samsung Electronics launched its new smartphone platform 'bada' at the 'Global Developer Day' organised in Bengaluru recently. At this first ever initiative organised by Samsung, the company engaged with the developer community and presented the unique benefits and unprecedented opportunities that the bada platform will bring to developers, mobile operators and consumers as well as gave an introduction to fundamentals of bada application development.

Active music space from Videocon d2h

Videocon d2h, a DTH service provider, is now ready to give its customers a unique music experience free by launching Active Music Space 24 hours with two audio-video and 20 audio channels. Currently, it has 250 channels and services on the DTH platform.

Intex launches Flash memory based products

Intex Technologies has introduced an exciting range of easy-to-install USB pen-drives and Micro SD for desktops, notebooks, DVD players and mobile phones. The products have been introduced after undergoing all contemporary and coveted technical tests like read-write speed verification test, aging test with continuous write-read-erase-write up to 12 hours and chipset ID verification.

A unique but affordable faxing solution

Knowlarity Communications has come up with the SuperFax, a solution that allows you to receive faxes in your e-mail inbox as a PDF file attachment. According to the company, you also get an SMS alert as and when you receive a fax. And if you wish to send a fax on to a particular number, just compose an e-mail, attach the file (in any format) that you need to fax and send it to 'faxnumber@superfax.in'. The fax gets delivered to the intended number.

HOME THEATRE SYSTEMS

SETTING UP BOSE LifeStyle V-CLASS AND T-CLASS SYSTEMS IS EASIER AND FASTER

Bose has introduced Lifestyle V-Class and T-Class home theatre systems, combining proprietary 5.1 surround sound with a breakthrough technology that overcomes

Price:
Lifestyle V35: Rs 224,888
Lifestyle V25: Rs 179,888
Lifestyle T20: Rs 157,388

when the connection is successful.

much of the growing complexity of setting up and using home theatre systems.

The new Lifestyle systems simplify the set up of multiple components, and transform everyday use: onscreen displays work seamlessly with just one remote, and selecting and switching between sources is done at the touch of a button. With Unify technology, easy-to-follow steps are shown on the TV screen. They are written in plain language, even showing pictures of the right connector. The Lifestyle system console recommends the right cable to use, has smart inputs that sense when a connection is made, and confirms

The systems can accommodate up to six HD sources. The remote can operate virtually any entertainment device, including Blu-ray players, cable boxes, digital media adaptors and new devices as they become available.

The V-Class systems include jewel cube or direct/reflecting speaker arrays, a built-in AM/FM tuner, a dock for iPod, and a universal remote control with a two-line display to show what radio station or song is playing; there's no need to turn on the TV.

The T-Class systems include direct/reflecting or virtually invisible speaker arrays, and a universal remote control.

WEBCAM WITH VGA VIDEO

WITH MICROSOFT LIFECAM VX-2000, SHARE LIFE THE WAY YOU LIVE IT!

Get ready for an all-new exciting video calling experience with Microsoft Hardware's latest webcam, the LifeCam VX-2000, that combines an elegant design with a high-quality built-in microphone. This webcam is easy to set up; using your broadband connection, you can easily connect with

friends and family in seconds.

The LifeCam VX-2000 is not only good in terms of technology but also easy on the wallet. Featuring VGA video and 1.3MP still photography, it provides crystal-clear images. It auto-adjusts to low-light conditions and creates bright pictures in a variety of scenarios.
