

Battery

Installation

Tips

- Do not connect more than 3 strings of batteries in parallel
- Ideally each string should have a separate charger
- Use a torque wrench to tighten the bolts to specified torque value

VRLA and Tubular batteries

VRLA Batteries - 12V 7AH to 250 AH

Tubular Batteries - 12V 40AH to 210 AH

- Part of a Rs.1000 crore IT industry group
- Tested and certified by Central Power Research Institute, Bangalore (CPRI) and Electronic Test and Development Centre (ISTQC Directorate, Ministry of Information Technology, Govt. of India). **Download Test Certificates at www.relicellbattery.com**
- UL Certified
- VRLA Batteries approved and registered in DGS&D for government purchases
- 47 Service Centres across India

EFY Annual Directory

In the Electronics For You Annual Guide 2009-10 (winter edition), our company name is missing under the product category index.

Anil Gupta

Advance Tech Services, New Delhi
EFY: Thanks for the information. The summer edition of the EFY Annual Guide (EAG) will carry all the updates in the product category index (yellow pages), including the details of your firm. We will also send you the login and password for elab2b.com website, which will allow you to update details of your firm directly and also verify whether the information has been updated at our end.

Home Power Savers

I thank EFY and the author, Gp Capt (ret'd) K.C. Bhasin, for publishing the 'Home Power Savers Demystified' article in May issue. I am one of the power saver victims. Seeing the advertisement of power saver devices on the Internet, I had purchased one from a vendor. After installing the power saver unit, I found that it consumed a high current rather than saving the electricity.

Your article will open the eyes of many EFY readers.

S.K. Mitra
Kolkata

Suggestions

I am a regular reader of EFY and suggest you to publish construction articles on:

1. Small, portable cooling machine that can be carried outdoors and also used in a room to work as an AC. It should be the size of a small room heater but with power consumption as low as possible. The cooling machine can be based on a compressor (electromechanical) or Seebeck effect (electrical-electronic)

2. Low-cost solar PV panels

I also request you to publish an article on feasibility of setting up power plants on the moon and sending the generated electricity to the earth through microwaves to avoid pollution and global warming on the earth.

It could be a conventional alternator based power plant, fuelled by hydrogen, water and carbon available in moon environment, or a solar energy based plant. The article should discuss whether the lower gravity of the moon (one-sixth of the earth's) could help the alternator to produce more electricity and also the effect of Lenz's law at low gravity.

Gautam Kumar Mandal

New Cars

In the article 'New Cars Won't Let You Sleep!' published in March issue, please note that electroencephalogram (EEG) reflects the electrical activity of neurons near the brain scalp. EEG is a signal and not a high-end medical electronic equipment as mentioned in the article within the box on page 110.

Promit Biswas
Chittaranjan Park, New Delhi
EFY: Thanks for pointing out the same. Electroencephalogram is a measure of bioelectrical activity of the brain. Electroencephalograph is the record of this activity and EEG machine is a high-end medical equipment to perform this test.

ERRATA

In the 'EFY Top 40 Private Engineering Colleges' article of May issue, please read:

1. Jaypee Institute of Information Technology, Solan, as Jaypee University of Information Technology, Solan
2. The ICAI Institute of Science & Technology, Dehradun, as Faculty of Science & Technology, ICAI University, Dehradun
3. Godavari Institute of Technology, Hyderabad, as Godavari Institute of Engineering & Technology, Rajahmundry

☐ In the 'Power Savers Demystified' article of May issue, read the sentence "However, the manufacturer of these items is required to be certified by an appropriate authority designated under the Act" as "However, the manufacturer of such items is required to have a manufacturer certificate for the item from appropriate authority designated under the Act."
