

Global Faculty. Global Curriculum. Global Outlook

Sharda University's School of Engineering and Technology is a pioneering force in the field of technical education.

Since its inception in 1996, the group has expeditiously grown with campuses in Agra, Mathura and Greater Noida totaling 167 acres of land and 3.5 millions square feet of infrastructure. Sharda Group has 20,000 students and alumni and offers more than 75 programs in professional education. As its students have graduated and gone on to join prestigious companies and multi-nationals, its reputation has spread through the 10,000-strong international alumni network. Fiercely expanding Sharda University aims at establishing itself as a truly global university. The carefully formulated syllabi, efficient marking scheme and rigorous discipline adds to our efficient functioning.

The School of Engineering and Technology at Sharda University solely aims at the over-all enhancement of the students' personality, nurturing and gearing them to face the competent globalized world. The intrinsic desire has led us to adopt features like hiring the services of experienced foreign faculty from U.K., France and Greece, incorporating state of the art teaching methodologies as well as infrastructure. The university has its unique feature with totally flexible and credit based system for all engineering courses. Students can choose courses of their own choice and steam of specialization. Possibility of fast track option by earning extra credits in summer provides more freedom and better exposure to the recent know-how and industrial need.

The Research and Technology Development Centre (RTDC), sponsored by Sharda University has been established to investigate cutting edge high tech research in the frontier areas of science, engineering and medicines. A recent and interesting research being carried out by the approval of Department of Scientific and Industrial Research, Government of India on the development of the technology for piezoelectric transformer at the lab scale may ensure commercial exploitations at large scale. This particular

technology, if developed may ensure lot of societal impact in the country and many of our problems towards energy can be solved.

We also offer scholarship categories that are sponsored by Sharda Education Trust established by UP Legislative through Act 4 of 2009 in Greater Noida. There is a provision of more than Rs 1 crore for giving financial support in the shape of scholarship, stipend and assistance ship to the disadvantaged students having family income less than 2.5 Lakhs per annum.

There are two conference halls, cricket, football, volleyball, Tennis and badminton courts and fields upcoming fully air conditioned student community center with facilities of indoor gym, indoor badminton court, snooker, squash, restaurant and shopping complex and a community center that will have theatre of 1000 capacity. Our School of Engineering and Technology air-conditioned class rooms and lecture halls are furnished with modern teaching aids like multimedia projectors and computers with Wi-Fi connectivity.

The facilities catering to the needs of students are incomparable at Sharda. When it comes to technology, Sharda University has left no stones unturned. The learning environment, counseling services, placement cell, transportation, food and beverages, gymnasium, clubs, NGO internships exhibits our determination to provide the students all that they require and deserve.

The university is strategically situated in pollution free serene environment of Greater Noida just 40 min drive from Delhi. The wide roads, vast landscape adjoining the campus amidst Knowledge Park adds to the experience of studying in the biggest and most sophisticated campus in the entire Delhi National Capital Region and is a great attraction of the University. Privatized, reliable power distribution and RO installed ensures regular supply of power and clean drinking water to the students and staff.

With shrinking geographical boundaries, the University is exposing both faculty and students to a variety of foreign influences. Sharda University already has international collaboration agreements with Universities/Organizations including Institute of Technology, Blanchard town Mayo Institute of Technology, Galway Community College of Texas on Bio-diesel Research.

We have a special placement cell for the students to sharpen the managerial and creative talents inherent in our students and to unleash their education in an environment which privileges professional values and inculcates modern attitude. The Sharda Group has one of the best placement records in the industry and continues to place its students in diverse industry verticals with enviable starting packages.

At School of Engineering and Technology, we whole heartedly welcome the desire and efforts of faculty to enhance their qualifications. All members of faculty can avail themselves of a six month to one year sabbatical to continue their research or for pursuing honorable degrees etc. Sharda University already has an innovation centre where faculty members can research and develop prototypes, register and patent them. The centre also has tie ups with national and international institutions of repute. No institution has flourished without a vision.

The vision of Sharda University is to build future leaders in the fields of engineering and technology. The soul of Sharda University lies in its academic ambience, the competence of faculty and the systems through which the academic program is delivered. Together as a team we look forward to create talented and ferocious engineers that not only prove themselves as successful individuals but contribute to make this world a better place. The Sharda experience is thus a profound experience!
