compiler in MPLAB IDE. MPLAB IDE is a very powerful software development tool for Microchip's MCUs. It can be downloaded from www.microchip.com free of cost. It consists of tools like text editor, assembler, cross compilers and simulator. Hitech C compiler is meant for Microchip's PIC10/12/16

series of MCUs. Its Lite edition comes for free with newer versions of MPLAB IDE like MPLAB v8.2 or v8.3, and it can also be downloaded for free from www.htsoft.com.

The tasks performed by the software are:

1. Identify the key

SUSPENSE SUSPENSE SUSPENSE
SUSPENSE SUSPENSE SUSPENSE
SUSPENSE SUSPENSE SUSPENSE
SUSPENSE SUSPENSE SUSPENSE

Are You In Suspense?

Are you wondering what happened to your order or payment, even after a fortnight? But did you mention your name and address clearly while sending payment, and what the payment was for?

We get several payments every month without adequate instructions or even identity of the person sending the payment. As a result we are unable to take appropriate action on these, till we get a complaint - if at all.

At EFY, we want you to be our satisfied customer. So please do let us know in case your payment or instructions are not even acknowledged within a fortnight. We are not that lazy!
