

MSI (Micro Star International) Wind U160

Features

- Screen size: 25.7cm (10.1-inch)
- Display resolution: 1024×600
- Netbook keyboard size: 83-key MSI Chiclet keyboard and SeamlessTouch pad
- Operating system (Windows or Linux): Microsoft Windows 7 Starter
- Hard drive size, type (solidstate or spinning): 320 GB or above (6.4cm SATA)
- Processor: Intel Atom N450 (1.66GHz)
- Gaming/graphics chipset: Intel Graphics Media Accelerator 3150
- Installed Memory (RAM): DDR2 667 supports up to 2 GB (1 DIMM slot)
- Battery type and life: 6-cell, (15-hours battery life with 6 cells).
- Wireless connectivity: 802.11 b/g/n, Bluetooth V2.0EDR
- USB Ports: Three
- Weight: 1 kg

**Price
Rs 23,999**

support 16:9 format. Media-intensive mobility demands higher resolutions and HD. HD screens (1366×768) are available as an upsell to the standard 25.9cm screens (1024×600).

Since the netbook is a mobility product, clarity of the screen in the presence of ambient light is very important. Technologies like TrueLife ensure better colour intensity and contrast ratios in certain real-life light environments. LED-backlit LCD too makes a difference to brightness and contrast.

Battery life. A netbook may use a 3-cell, 6-cell or 9-cell battery. With a 3-cell battery, the netbook can run for two hours at a stretch without requiring recharging. The 6-cell battery life is 4-5 hours.

Six-cell battery is recommended because it will give you the best combination of cost and performance. Ask the vendor which battery is used in the netbook. You may be attracted to a lower-price netbook, which probably will have a 3-cell battery.

However, if you have regular access to power, go for a 3-cell battery. It makes the netbook lighter – important if you travel a lot.

MSI claims that its U160 is the only netbook that offers 15 hours of continuous run time from a 6-cell battery.

Keyboard. The keyboard of the netbook should be comfortable to work with. Generally, it is 90-95 per cent the size of a normal notebook's keyboard. The chiclet keyboard design of MSI netbooks reduces typing errors and increases comfort compared to regular keyboards.

Multi-gesture touch pads in Acer netbooks make the use of a mouse redundant.

Operating system. You can choose between Linux, Windows XP Home, Windows 7 Starter and Windows 7 Home Basic operating systems. The choice of an operating system mainly depends on the user experience, followed by cost considerations. Linux is an obvious choice if you are budget-conscious. Windows, on the other
