

additional cost of another set?

You can use a single antenna but you need multiple TVs. On your monthly charges, Tata Sky offers up to 75 per cent discount on multiple TVs.

Using separate remotes for the TV and the set-top box (STB) is a big pain for the customers. Do you too plan to come up with a universal remote like Airtel Digital TV?

Market feedback suggests that consumers aren't looking for a universal remote. You may have a TV that's not compatible with the universal remote.

How do you position yourself in the market? Cost benefits or picture quality? With BIG TV, one pays less but can access many channels. Airtel is regarded as high on picture and sound quality and features like universal remote.

We offer interactive applications, which are useful to consumers. We provide the greatest value in the market and believe in giving those products and services that one can't get anywhere else in the market. On the technology front, we have the most advanced consumer-oriented initiatives. World over, people use programme video recorder (PVR). We are the only one for the last 17 months to offer PVR in India. We are the first to introduce electronic programming guide (EPG) in Hindi/vernacular language for rural population. After us, one more player has launched this facility. Interactive technology allows you to learn English, maths, science, general knowledge, cooking recipes, etc at any time of the day. We even allow shopping when watching TV. So you can send a Blackberry device to your cousin using a few buttons of Active Services.

With IPTV (TV, phone and Internet on a single broadband connection) gaining momentum, and competition from CAS cable TV, will DTH TV be able to survive?

We believe DTH will dominate in India. For a large country like India, it's the cheapest option. For instance, if one is living 20 km away from Bikaner, drawing a cable connection for CAS or IPTV to that place will prove expensive.

Within DTH TV space itself, there are now many providers. Do you think there is room for everybody to grow?

With 200 million homes, of which 120 million have TVs, there is enough space for multiple technologies and players to survive.

Who is providing STBs to Tata Sky?

We use STBs from Humax and Thomson, which are locally assembled in India.

What are your future plans for India?

We expect to double our subscriber base by 2012. That's all that I can share at the moment. ●

BINAY – Lighting Up The Future

BINAY LED

Aviation Obstruction Lights for:

- Industrial Chimneys
- Radio, TV and Structural Towers
- High-rise Buildings & Structures
- Airports and Airfields

Available In Low Intensity and Medium Intensity Versions (as per the International Civil Aviation Organization guidelines), BINAY's PATENTED LED Aviation Lights come with a 5-year Warranty.

BENEFITS

- Rt-and-forget maintenance-free operation
- Long life of 100,000 hours (20 years at 12 hours daily burning)
- Shock-proof and vibration-resistant

THE BINAY LED OBSTRUCTION LIGHT IS UNDER ACCEPTED PATENT, AND AS SUCH IS A PROPRIETARY PRODUCT
