

Property Settings for Controls

Control	Property	Settings
Form	Caption	EFY Executive Dash Board
	BackColor	As shown
	BorderStyle	FixedDialog
	Name	Dash
Shape (4 Nos)	StartUpPosition	Center of the owner
	Style	Rectangle
	Borderwidth	2
	Bordercolor	As shown or as you wish
Label	FillColor	As shown or as you wish
	Alignment	Center
	Caption	Executive dash board
	Font	Font: Script MT Bold, Style: Bold, Size: 20
MSChart (4 Nos by copy-and-paste method)	BackColor	Parrot green
	ForeColor	Red
	AllowSeriesSelection	False
	Border style	VBBorderStyleFixedSingle
	ShowLegend	True
	ChartType	(i) VtChChartType2Dbar (ii) VtChChartType3Dbar (iii) VtChChartType2DPie (iv) VtChChartType2DLine
	TitleText	(i) Sales department (ii) Accounts department (iii) Editorial section (iv) Organisation staff details
TextBox (2 Nos)	Alignment	Center
	BackColor	As shown for both
	Enabled	(i) False (ii) True
	Text	(i) "" i.e. Blank (ii) 0000
Frame (4 Nos)	ForeColor	As shown for both
	Font	Style: Bold, (i) Size: 12 (ii) Size: 18 "" i.e. Blank
	Caption	
	Caption of 5 buttons in each group	2DBar, 2DBar, 2DLine, 2DLine, 2DPie
Option buttons: A group of 5 buttons placed in each of the four frames by copy-and-paste method	ForeColor	White for each group
	Font	Style: Bold, Size: 8
	BackColor	As shown for each group
	Interval	2000
Timer	ConnectionString	As explained in the previous VB articles based on MS Access

Note: Numbers (i), (ii), (iii) and (iv) shown under 'setting' are control numbers

Adodcl.Recordset.MoveNext	> 0 Then
Wend	Adodcl.Recordset.Fields(3).Value =
'check on full staff	Adodcl.Recordset.Fields(3).Value - 1
If M = N Then	M = M - 1
MaxBool = True	Text2.Text = M
End If	End If
	Adodcl.Recordset.Update
Case True:	Adodcl.Recordset.MoveNext
While Adodcl.Recordset.EOF = False	Wend
If Adodcl.Recordset.Fields(3).Value	'check on no staff

```
If M = 0 Then
MaxBool = False
End If
End Select
End Sub
```

The chart control events are used together to display the value of any part of the chart/graph in the textbox control when you click that part. The textbox is moved to that place by setting its top and left properties. The required code follows:

```
Private Sub MSChart1_MouseDown(Index
As Integer, Button As Integer, Shift
As Integer, X As Single, Y As
Single)
Timer1.Enabled = False
TY = Y + MSChart1(Index).Top
TX = X + MSChart1(Index).Left
End Sub

Private Sub MSChart1_
PointSelected(Index As Integer,
Series As Integer, DataPoint As
Integer, MouseFlags As Integer,
Cancel As Integer)
Text1.Text = MSChart1(Index).
ChartData(DataPoint, Series)
Cancel = 1
If Text1.Text <> "" Then
Text1.Top = TY
Text1.Left = TX
Text1.Visible = True
End If
End Sub

Private Sub MSChart1_MouseUp(Index
As Integer, Button As Integer, Shift
As Integer, X As Single, Y As
Single)
Text1.Visible = False
Text1.Text = ""
Timer1.Enabled = True
End Sub
```

You can also select a particular information in the chart for details. For example, if you click the box corresponding to EFY, you can see EFY details highlighted in the chart.

EFY note. All the relevant source codes of this article have been included in this month's EFY-CD. ●
