

SCSI Trade Association (STA). Using the TekExpress software, storage system designers can complete these tests by simply pressing a single button, which ensures accurate and consistent results.

SAS is the dominant storage interface for enterprise server environments offering scalability, improved speed and higher reliability compared to SATA or previous-generation parallel interfaces. Transmitter validation and debug for 6Gbps SAS designs requires accurate jitter and eye analysis and differential S-Parameter characterisation. With the addition of 6Gbps SAS support, the TekExpress automated test software meets the varied test demands facing everyone from silicon providers to drive manufacturers to OEM system houses.

High-frequency LCR meters

GW Instek has introduced the LCR 8000G Series of high-frequency meters—LCR-8110G and LCR-8105G—to meet the growing need for high-frequency component and module characterisation.

The LCR 8000G Series provides accuracy, versatility and high resolution for a wide range of component measurements, including DC resistance

measurements and voltage or current monitoring. Component characteristics can be verified using a number of circuit models and test frequencies to emulate real circuit operation, ensuring accurate verification and significantly reduced trial and error time. Each program sequence supports up to 30

test steps set with separate parameters and test limits.

COMPUTING

Motherboard for P55 platform

Gigabyte Technology has launched a motherboard for the P55 chipset platform, the GA-P55A-UD7. The motherboard meets the needs of power

users and gaming enthusiasts with features like a 24-phase power design, NVIDIA 3-way SLI/ATI CrossFireX as well as support for USB 3.0, 3x USB power boost (unique to GIGABYTE) and SATA 3.0 (6Gbps).

STORAGE

Tiny USB flash drive

SanDisk Corporation has begun shipping one of its smallest USB flash drives ever. The Cruzer Blade drive measures 41.5×17.6×7.4 mm³ and

weighs just 2.5 gm, creating a tiny footprint that can fit in almost any pocket.

Much smaller than many other USB flash drives, the Cruzer Blade does not block neighbouring USB ports on a

computer. It supports plug-and-play and is compatible with commonly used computers.

The drive is available in capacities ranging from 2 GB (priced at Rs 699) to 16 GB (Rs 2999).

Ultra-secure USB flash drive

Kingston Digital, Inc. has released a USB Flash drive that is FIPS 140-2

Level 2 certified with Level 3 pending, and features 256-bit AES hardware-based encryption.

The DataTraveler 5000 uses XTS cipher mode and elliptic curve cryptography (ECC) algorithms to meet Suite B standards approved by the US government. It is available in 2GB, 4GB, 8GB and 16GB capacities.

High-performance external hard drive

Transcend Information, Inc. has introduced the latest addition to its Store Jet external hard drive lineup, the Store Jet 35T. With its Turbo HDD USB transfer mode and one-touch auto-backup button, the compact 8.9cm StoreJet 35T is an ideal data management system for uploading, downloading, storing and transferring vital data and information.

The size of a hardback book, the black streamlined Store Jet 35T offers up to 1.5TB capacity, providing ample space for essential files, folders, documents, photos, music and high-definition videos.
